Practice Test 1 : Part A – Extract 1 Q(1-12)

You hear a cardiologist talking to a patient referred for dizziness. For questions 1-12, complete the notes with a word or short phrase.

- Patient Jack Thatch

  Reason for Referral Dizzy spells

  History of Condition

  Onset of symptoms: **(1)** _____

  Effect on daily life: Prone to falls

- Some episodes caused loss of **(2)** _____

- Early episodes triggered by physical exertion **(3)** _____

- Change in episodic trigger pattern: Patient started to have symptoms while **(4)** _____

  Takes about 10 – 15 minutes to recover

- Severity: Enough to warrant intervention by way of calling an **(5)** _____

- Third person account: Jack appeared **(6)** _____ during an episode

- A& E check for **(7)** _____ came back negative

- **Diagnosis and Treatment**

  Suspected condition: **(8)** _____

- **(9)** _____ detected from most recent ECG

- Stokes-Adams attacks due to **(10)** _____ heartbeat – cause of blackouts

Electrical impulses telling the heart when to beat are delayed or blocked

- **(11)** _____ needed (to monitor and control heartbeat)

- Surgery required – although it's not **(12)** _____

Discharge: Usually within 24 hours of the procedure

Practice Test 1 : Part A – Extract 2 Q(13-24)

You hear a GP talking with a patient complaining of lack of energy.

- Patient Mrs Halloway

Reason for Appointment: Lack of energy

History

Occupation: Solicitor
Growing fatigue over the **(13)** _____

Affecting professional life: fell **(14)** _____ at work a few times

Affecting social life: gave up weekly tennis game
Affecting personal life: sleep patterns disrupted

- Suffered depression **(15)** _____ years ago (marriage breakdown)

- Physical symptoms: constipation and **(16)** _____ gain

- Family history of **(17)** _____

- **Possible Diagnosis**

Normal **(18)** _____ levels (diabetes ruled out)

- Skin: dry and **(19)** _____
Anaemic

- Lipid level: **(20)** _____ (indicating hypercholesterolaemia)

- Early diagnosis: **(21)** _____

- **(22)** _____ interfering with sleep

- Condition ismore prevalent in **(23)** _____
Patient's age is an added risk factor

- **Next Steps**

Requires **(24)** _____ tests to be sure of diagnosis

Practice Test 1 : Part B – Q(25-30)

For questions 25 to 30, choose the answer (A, B or C) which fits best according to what you hear. You'll have time to read each question before you listen. Complete your answers as you listen.

- 25

You hear a conversation between a GP and a patient about recurring diarrhoea.

What does the GP ask the patient to confirm?

- A Whether she caught the disease in St Petersburgh, Russia.
- B Whether she was in the vicinity of a place with the disease recently.
- C Whether she had been to the tropics recently as the disease is common there.

- 26

You hear a physician in the A&E department talking with a patient presenting with abdominal pain.

The physician wants to deal with the patient's dehydration by...

- AOrdering an x-ray of the patient's abdomen.
- BHaving blood drawn in order to run tests.
- CHaving an IV put in while other tests are run.

- 27

You hear a ward briefing about a newly admitted patient.

What does the doctor conducting the briefing want to confirm?

- AThe reason the patient is in pain.
- BThe reason the condition was triggered.
- CThe reason the patient's eyes are sore.

- 28

You hear part of a training on communication between providers.

What will be the priority of the new role discussed?

- ATo improve communication between doctors and patients
- BTo improve communication between patients and nurses
- CTo improve communication between doctors and nurses.

- 29

You hear a trainee doctor discussing stress with a senior GP.

What does the senior doctor identify as the cause of the problem in general practice?

- AThe unwillingness of younger GPs to work locally or full time.
- BThe number of doctors opting to go into general practice.
- CThe difficulty with balancing the long days with family life.

- 30

You hear a conversation between a nurse and a doctor about scheduling appointments.

Why did the nurse mention that she had already spent an hour on the task?

- ATo show that she had already put in reasonable effort before asking for help.
- BTo show that she does not have enough information to complete the task quickly.
- CTo show that she is also feeling the effect of the hospital being short-handed at the moment.

Practice Test 1 : Part C – Extract 1 Q(31-36)

You hear part of a presentation about a recent report on podiatry education.

- 31

The speaker points out that many of the foot conditions people suffer from…

- AAre more common among the elderly.
- BDo not necessitate medical intervention.
- CCan be dangerous if handled by someone without skill or knowledge.

- 32

What is the main purpose of the project?

- ATo save money by empowering patients with minor conditions
- BTo discharge as many patients as possible for the podiatry service
- CTo focus all of the podiatry service's efforts on high risk conditions

- 33

What types of patients were deemed suitable for self-care?

- AThose with high risk medical or podiatric needs
- BThose able to take care of low risk conditions
- CThose with a medically-trained family member

- 34

What was offered to patients considered to be low risk?

- ASmall group educational sessions

- BOne-to-one assessment appointments
- CSmall group assessment sessions

- 35

How did the project result in cost savings?

- ABy reducing the total number of patients seen by podiatrists
- BBy reducing the number of podiatrists seeing patients
- CBy reducing the number of appointments involving low risk patients

- 36

According to the speaker, the primary benefit to patients was…

- AThe quality of care that podiatry patients received
- BThe amount of time patients had to wait to be seen
- CThe level of satisfaction of all podiatry patients

Practice Test 1 : Part C – Extract 2 Q(37-42)

You hear an interview with a nurse about common problems in hospitals

- 37

What is the current role of the interviewee?

- AA leader of an organization that works to promote nursing
- BA nurse with experience working with elderly patients
- CA health practitioner with a background in emergency medicine

- 38

According to the interviewee, what is causing the lack of physician integration?

- AThe poor communications systems in place
- BThe lack of permanent physicians at hospitals
- CThe integrated care model recently adopted

- 39

Why was the interviewer surprised by the interviewee's initial response about challenges?

- ABecause he does not agree with what she has said.
- BBecause he has information that contradicts what she said.
- CBecause he has heard information about another problem.

- 40

According to the interviewee, what is the most serious result of short-staffing?

- AJob satisfaction and burnout of nurses
- BSignificant turnover in health systems
- CIncreased risks to patient safety

- 41

The interviewee notes that long hours can negatively affect…

- AThe mental abilities of nurses
- BThe physical abilities of nurses
- CThe family and social life of nurses

- 42

What challenge does the interviewee say might be surprising to many?

- ADomestic violence
- BBullying by physicians
- CBullying by patients
-

Practice Test 2 : Part A – Extract 1 Q(1-12) Answersheet

You hear a physiotherapist talking to a new patient called Alice Jackson. For questions 1-12, complete the notes with a word or short phrase.

- Patient Alice Jackson

  Referral from GP

  Initial diagnosis: Tennis elbow of the **1)** _____ arm

  Patient Description of Condition

  No specific injury

  Onset: 5 months ago

- Initial pain was **2)** _____

  Patient thought she had bumped into something

- Pain increased after **3)** _____

  Daily activities disrupted

  Turning point was decreasing inability to hold a saucepan of boiling water

- Recommendations of GP

  Patient refused the **4)** _____

- Instead, patient opted for **5)** _____ (ineffective)

  Referral to a physiotherapist

- Pain Management Options
- Injection (not helpful as patient has had the pain for more than **6)** _____

- Acupuncture (to be done **7)** _____ and in conjunction with physiotherapy)

- Physiotherapy (needs time to take **8)** _____)

Pain Management Options

Exercises done at home

- Pain Management Options

Targets the **9)** _____)

Increases strength

- Start with low **10)** _____

- Signs of overdoing it: More **11)** _____

6 weeks before noticeable improvement

12 weeks for full resolution

Recurrence Rate of Condition

Can include short-term flare-ups or long-term recurrence

Varies between patients

- Generally quite low (if physiotherapy is adhered to and correct **12)** _____ is used)

Practice Test 2 : Part A – Extract 2 Q(13-24) Answersheet

You hear a gastroenterologist talking to a new patient called Luke Thomlinson. For questions 13-24, complete the notes with a word or short phrase.

- Patient Luke Thomlinson

  Reason for Appointment

  Extended bout of diarrhea

  Background

  Severe diarrhea: visited the Emergency Department

  Symptoms have been ongoing for **13)** _____

  Drastic weight loss (14kg) in 16 days

  BMI below healthy range

- Texture of faeces: **14)** _____ (without **15)** _____ or mucus)

- Patient initially dismissed the symptoms as unimportant

  Symptoms intensified (diarrhea up to 10 times per day)

- Notes from the Emergency Department

  On admission: Dehydrated and had **16)** _____ respiratory rate

- First line of treatment - **17)** _____

- Change of diet to cut out **18)** _____ and lactose

  Reinforced with thiamine and added B complex

  Ruled out overseas infection (no recent travels abroad)

- Negative result for **19)** _____

- Next Steps

Need to rule out **20)** _____ (related to **21)** _____ in the small intestine)

- Initial testing will be painless

  To start with a blood test

- To **22)** _____ with usual eating habits (to prevent a **23)** _____ in the test results

- A **24)** _____ is also advised

- May require endoscopy to get biopsy samples of lining of the small intestine

  Patient informed that all results may return as negatives due to rarity of suspected condition

Practice Test 2 : Part B – Q(25-30) Answersheet

For questions 25 to 30, choose the answer (A, B or C) which fits best according to what you hear. You'll have time to read each question before you listen. Complete your answers as you listen.

- 25

  You hear a doctor briefing a colleague about a patient.

  How does the doctor correct his initial diagnosis?

  - ABy looking at the patient's appearance
  - BBy getting images of the problem area
  - CBy consulting with another doctor

- 26

You hear a nurse asking a doctor for help with a patient.

What does the doctor suggest be done with the patient?

- ATo let him rest and see if the pain continues
- BTo perform an ultrasound to rule out a fracture
- CTo quickly eliminate a more serious possibility

- 27

You hear part of a morning briefing in a hospital ward. Now read the question.

What is the plan for the patient today?

- AShe will be given medication to treat her condition
- BShe will be given medication to help deal with a symptom
- CShe will be given a diagnosis based on lab results

- 28

You hear a nurse asking a colleague for advice.

What does the colleague recommend?

- ATo refer the patient and his family to a specialist for support
- BTo get the patient long-term follow-up and support immediately
- CTo get the family of the patient involved in his care

- 29

You hear a podiatrist presenting a course of treatment.

What type of intervention was chosen?

- ARemoving the problem by cutting back the nail under local anesthetic
- BUsing a chemical to prevent a recurrence ofin-grown toenail
- COpting for a combination of surgery and topical medication

- 30

You hear a patient asking a physiotherapist about his current treatment.

What does the physiotherapist clarify for the patient?

- AThat the injury is more severe than originally thought
- BThat the therapy needs to be continued for now

- CThat a new injury might have recently occurred

-

Practice Test 2 : Part C – Extract 1 Q(31-36) Answersheet

You hear an interview with an expert on Angelman syndrome, a rare genetic disease.

- 31

Why did Dr Terry leave her career in public health?

- AShe was interested to earn a master's degree in the US
- BShe was not fulfilled by her work in public health
- CShe was influenced by the diagnosis of her child

- 32

How did Dr Terry react to her son's condition?

- AShe looked for information about the disease
- BShe decided to become more educated about it
- CShe became involved in patient advocacy groups

- 33

Why does Dr Terry mention Huntington's?

- ABecause it is a disorder related to Angelman
- BBecause it is a more familiar disorder
- CBecause she is also interested in researching it

- 34

What assumptions about Angelman syndrome have recently changed?

- AWhether doctors know how to properly diagnose the syndrome
- BWhether the disease occurs only in certain places or populations
- CWhether children with the syndrome can attend school

- 35

What caused Dr Terry to seek out a diagnosis for her child?

- AHer child was too cheerful and enthusiastic
- BHer child couldn't communicate or do other common tasks
- CHer child was given a referral to a geneticist

- 36

What happened as a result of the conference Dr Terry attended?

- AShe met the person who found a cure for Angelman
- BShe learned about the gene that is responsible for Angelman
- CShe developed an idea for treatment of Angelman

Practice Test 2 : Part C – Extract 2 Q(37-42) Answersheet

You hear a speech pathologist Kevin Drews giving a presentation to a group of trainees.

- 37

Kevin says that this training will be particularly valuable for

- AThose interested in becoming a speech pathologist
- BThose interested in a medical career treating children
- CThose interested in a medical career as a general practitioner

- 38

Kevin says that children with expressive language delays

- AHave difficulty understanding language directed at them
- BHave difficulty producing oral language
- CHave difficulty constructing sentences

- 39

Kevin says that most children with LLE will eventually

- ANever develop language skills similar to other children their age
- BGo on to develop normal language skills by the age of about 5
- CDemonstrate language delays until they reach the age of 7

- 40

According to Kevin, which is an example of a child-related risk factor?

- AThe development of motor skills
- BThe number of siblings
- CThe access to learning opportunities

- 41

According to Kevin, initial treatment for LLE involves

- ADirect intervention alongside other specialists
- BGiving access to learning opportunities
- CMonitoring development and indirect intervention

- 42

What is key for a successful intervention plan?

- AInvolving other specialists
- BWorking closely with the family
- CTaking into consideration culture

Practice Test 3 : Part A – Extract 1 Q(1-12) Answersheet

You hear an optometrist talking to a patient called Austin Jacobs. For questions 1-12, complete the notes with a word or short phrase.

- Patient: Austin Jacobs

Reason for visit:Eye problem

Background

Onset: 4 days ago

Condition started with the **1)** _____ eye.

Described as itchy and irritated

Condition affected both eyes a day later

Presence of yellow discharge in **2)** _____ eye.

Difficulty in opening eyes

- Absence of **3)** _____ in the eyes
- **4)** _____ is normal
- Can rule out **5)** _____ (no relatives with this condition)

  Not using eye drops

  Does not wear contact lenses

- Patient takes reasonable **6)** _____ of eyes
- Diagnosis

  A type of **7)** _____

- Various types but most likely type in this case is **8)** _____

  Inflammatory response to infection of the eyes

  May also involve upper respiratory infection

- Most likely contracted from: **9)** _____

- Recommendations

  10) _____ will not be prescribed

  Disease expected to clear up on its own in a couple of weeks

- Can apply **11)** _____

  Cool compresses recommended (but cautioned not to rub eyes with them)

  Extra precautions need to be taken with hygiene

  Disinfectant techniques advised

- Avoid **12)** _____ to others

Practice Test 3 : Part A – Extract 2 Q(13-24) Answersheet

You hear a GP talking to a patient called George Babsy.

- Patient George Babsy

  Reason for Appointment

  Sudden onset of severe pain

  Symptoms

Sudden sharp pain (while putting away tools)

Waited to see if pain would go away

Accompanied by vomiting (**13)** _____ times)

- Pain started just below the **14)** _____

  Pain then radiates towards the back

- Shift in pain level with different body positions (pain **15)** _____ when sitting forward)

- Medical History

  Does not drink alcohol

  Patient is a **16)** _____

- Had a problem with **17)** _____ in the past

  Not on any medication at the moment

  BMI within normal range

- Initial Diagnosis and Recommendation

  Not likely caused by previous night's **18)** _____

  Pulse elevated and epigastrium tender, so hospital admission required

- Initial tests: Abdominal **19)** _____ and **20)** _____
- Possibly gallstones causing inflammation (condition is called **21)** _____) inflammation often because of gallstones

- Symptoms only partly consistent with tentative diagnosis (risk factors include being a **22)** _____, which is not the case

- Requires a further test to determine level of patient's **23)** _____

- Accuracy is increased the **24)** _____ the test is done to the start of the pain

Practice Test 3 : Part B – Q(25-30) Answersheet

For questions 25 to 30, choose the answer (A, B or C) which fits best according to what you hear. You'll have time to read each question before you listen. Complete your answers as you listen

- 25

  You hear an A&E doctor briefing a colleague about a patient.

  The A&E doctor

  - Athinks that the cough medication is causing the patient's rash
  - Bthinks that the absence of other symptoms is unusual
  - Cthinks that further investigation is necessary

- 26

  You hear a dermatologist in a training session with an intern.

  Why does the dermatologist ask about the next step?

  - ABecause the patient is in pain due to his condition
  - BBecause he wants to hear the intern's recommendation

- CBecause he wants to hear the intern's diagnosis

- 27

You hear an intern asking a senior doctor about the diagnosis of a patient.

How does the senior doctor deal with the intern's concern?

- ABy telling her that she is looking at the wrong symptoms
- BBy helping her to reexamine the patient's symptoms
- CBy telling her to be sure of what the symptoms of Parkinson's are

- 28

You hear a morning briefing in a ward.

What does the doctor prioritise for the patient's care?

- AHelping the patient with his balance problems
- BGetting a neurologist to confirm a diagnosis
- CLearning more about the patient's background

- 29

You hear two radiologists discussing the possible diagnosis of a patient.

What does the female doctor describe?

- AA plain radiograph showing the patient's skull
- BA CT scan showing an abnormality
- CA patient with a rare disease

- 30

You hear a patient expressing a concern to an occupational therapist.

What does the patient wish to be able to do?

- AWalk up the stairs without using a hand rail
- BSupport herself using her right arm
- CBe able to take a shower by herself

You hear a presentation by a dietitian about a diet recommended for people with a certain gastrointestinal condition.

- 31

Why does the speaker mention the rate of incidence of IBS?

- AShe wants to show the audience that it is an important condition.
- BShe wants to show that Australians are more likely to have the condition.
- CShe wants to show that women are more likely to develop the condition.

- 32

Why are potential IBS sufferers tested for other diseases?

- ABecause there are other diseases more common than IBS.
- BBecause there is no direct way to test for IBS.
- CBecause there are diseases that generally co-present with IBS.

- 33

Why does the speaker say IBS is a difficult disease to manage?

- AIt is not possible to know which symptoms will occur or when.
- BIt is not possible to diagnose patients with the condition.
- CIt is not possible to lessen the negative impact it has on patients.

- 34

What warning does the speaker give about a low-FODMAP diet?

- AIt can be dangerous for some patients with gastrointestinal problems.
- BIt includes foods that most people do not enjoy eating.
- CIt may not be effective for all patients suffering from IBS.

- 35

Why is it difficult to stick to a low-FODMAP diet?

- AThere are many popular foods which are high-FODMAPs.
- BThere are no low-FODMAP products available.

- CThere are few places to buy low-FODMAP foods.

36

According to the speaker, what effect can high-FODMAP foods have on the digestive system?

- AThey cause the gut to attract water, release gas and stretch the intestines.
- BThey cause the gut to process the food slower than usual and breed bacteria.
- CThey cause the gut to expand due to high levels of water and gas.

Practice Test 3 : Part C – Extract 2 Q(37-42) Answersheet

You hear a dermatologist, Derek Evans, give a presentation about the challenges facing his speciality.

37

According to the speaker, the most important challenge facing dermatology is…

- AThe financial aspect of seeking treatment
- BThe low priority placed on the specialty
- CThe lack of contributions made by the specialty

38

Why does the speaker mention skin cancer and women's health?

- ATo give examples of priorities in dermatology
- BTo give examples of failures in dermatology
- CTo give examples of the importance of dermatology

39

According to the speaker, what is needed to increase the number of dermatology residents?

- AA way to increase the number of residency positions available
- BA way to fund more residency positions in the specialty
- CA way to train new dermatologists more efficiently than currently

- 40

According to the speaker, how is dermatology perceived by policymakers?

  - AThere is a perception that the specialty is only for the rich and famous.
  - BThere is an old-fashioned perception of the specialty.
  - CThere is a perception that the specialty lacks diversity.

- 41

Other physicians have responded to the shortage of dermatologists...

  - ABy treating dermatological disorders themselves
  - BBy not referring their patients to dermatologists
  - CBy recognizing the need for more dermatologists

- 42

According to the speaker, who or what is overly involved in dermatological research?

  - APharmaceutical industry
  - BResearch funders
  - CDoctors of other specialities

Practice Test 4 : Part A – Extract 1 Q(1-12) Answersheet

You hear a GP talking to a patient called Seth Kelly. For questions 1-12, complete the notes with a word or short phrase.

- Patient: Seth Kelly

Reason for visit: Routine check up

Medical History

Stage five **1)** _____ (diagnosed 2 years ago)

Being treated at specialized clinic for renal problems

- Began haemodialysis **2)** _____
- Also suffers from **3)** _____

No reports of breathing problems

- Current Condition

  Feeling **4)** _____ and weary (impacting social life)

- **5)** _____ is not affected
- Shuns **6)** _____ meals
- In retrospect, negative feelings can be traced to the patient's **7)** _____
- Reports past episodes of emotional and **8)** _____ abuse

  Had trouble fitting in at school

- Potential Diagnosis and Treatment Plan

Likely suffering from **9)** _____

- Requires a **10)** _____

  Referral to the clinic where he is currently being treated

- **11)** _____ therapy - to help with negative thoughts

- Caution to be taken before prescribing an **12)** _____, due potential side effects of mixing medications

  GP to remain in contact with kidney clinic

Practice Test 4 : Part A – Extract 2 Q(13-24) Answersheet

You hear a dermatologist talking to a patient called Karen Patch. For questions 13-24, complete the notes with a word or short phrase.

- Patient Karen Patch

  Reason for Appointment

  Referral for skin problem

  Symptoms

  Skin at back of neck has become **13)** _____ and heavily lined

  Unsure when it started

- **14)** _____ changes recently to the main area affected

- Cheeks and ears show **15)** _____ of excessive solar exposure

- Rough and patchy skin on hands are areas of solar **16)** _____

- Parts where the skin is unaffected by sun damage: **17)** _____ and **18)** _____

- Diagnosis

  The **19)** _____ of the skin has thickened

- **20)** _____ has solar elastosis

- Cutis rhomboidalis nuchae (also known as farmer's or **21)** _____ skin)

  Damage to collagen and elasticity

- Condition is unlikely to turn **22)** _____

  Patient at higher risk of skin cancers

- Recommendation

  Not to leave it alone

  Should be monitored **23)** _____ by a dermatologist

- Wear protective clothing when outdoors
- Use sunscreen, particularly on damaged areas

  To ensure better **24)** _____, early detection of skin cancer is crucial

Practice Test 4 : Part B – Q(25-30) Answersheet

For questions 25 to 30, choose the answer (A, B or C) which fits best according to what you hear. You'll have time to read each question before you listen. Complete your answers as you listen.

- 25

You hear an intern in radiology talking with a senior doctor.

How does the intern decide on the diagnosis?

- ABy looking at the patient's account of events
- BBy taking into account the physical exam in the A&E
- CBy examining the radiograph of the patient's injury

- 26

You hear a GP ask a colleague for advice about a patient.

What does the female doctor confirm?

- AThat the doctor should help the patient get screened for cancer
- BThat the doctor should give more information to the pati
- CThat the doctor should get more information about the guidelines

- 27

You hear an intern asking a senior doctor a question after a training session.

What does the senior doctor clarify for the intern?

- AThe recommendations he made for the patient
- BThe reason for the recommendations he made
- CAlternative recommendations for the patient

- 28

You hear a GP discuss a patient with a radiologist.

How does the radiologist respond to the GP's plan?

- ABy agreeing with the GP's next steps for the patient
- BBy suggesting an alternative to the GP's plan
- CBy asking the GP how he came up with his plan

- 29

You hear two nurses discussing a patient referred by his GP.

What does the female nurse identify as a cause?

- AThe patient's recent travels

- BThe patient's medical history
- CThe patient's oxygen levels

- 30

You hear a patient's family member expressing concerns to a nurse

What does the nurse say to prioritize in this case?

- AFinding a nursing home close to the patient's house
- BTaking the patient home for treatment
- CRespecting the patient's desires

Practice Test 4 : Part C – Extract 1 Q(31-36) Answersheet

You hear a presentation by a GP talking about group appointments.

- 31

Why does the speaker mention the increase in the demand for GP appointments?

- AShe wanted to show that more and more people need to see their GP.
- BShe wanted to show the need for looking for a new type of appointment.
- CShe wanted to show that increasing need for more GPs to be trained.

- 32

Why is the traditional appointment less effective than it used to be?

- ABecause it isn't enough time for the types of problems patients have.
- BBecause it isn't enough time for the GP to get to know the patient.
- CBecause it isn't enough time for the GP to see older patients.

- 33

Why does the facilitator make certain information visible for patients during the appointment?

- ASo that the patients can remember the main topic of the conversation.

- BSo that the doctor can use the information in the group discussion.
- CSo that the patients can use the information to ask the GP questions.

- 34

What is the main aim of the group appointment?

- ATo dedicate less time to each patient
- BTo give patients an opportunity to learn
- CTo have patients ask the GP questions

- 35

What was the patient's perception of the group appointment?

- AIt took a long time for the group to get going.
- BNot everyone shared a lot of information.
- CThe group felt connected during the session

- 36

It is still best to use a traditional appointment with a patient when..

- Athe patient has a diagnosed, long term illness.
- Bthe patient wants the support of a peer network.
- Cthe patient does not have any particular diagnosis.

Practice Test 4 : Part C – Extract 2 Q(37-42) Answersheet

You hear a researcher being interviewed about a new class of cancer drugs.

- 37

Why is the researcher excited to share the news at this moment?

- ABecause they have just completed trials with the new drug.
- BBecause they have just gotten permission to use the drug.
- CBecause they have just started to review the results of studies.

- 38

How are the new drugs different from previous approaches to treatment?

- AThey target genetic abnormalities in the body.
- BThey target a particular area of the body to treat
- CThey target cancer in various parts of the body.

39

According to the speaker, what is needed to be able to offer the treatment to patients in the UK?

- AThe approval from European regulators
- BA certain kind of genomic testing
- CAn agreement between NHS and European authorities

40

According to the speaker, what is the cause of Charlotte's tumour?

- AThe tumour genes take over and replace the DNA present in the patient
- BPatient DNA comes together with another and creates an alteration
- CPatient DNA is altered for a reason that doctors do not understand

41

According to the speaker, researchers originally feared that Charlotte's type of cancer...

- ACouldn't be treated because of the way the genes were linked to neurological cells
- BCouldn't be treated because of the possibility of causing other cancers
- CCouldn't be treated because of the importance of the genes in development

42

What is the difference in the way children and adults respond to the treatment?

- AChildren respond better to the treatment.

- BThere is no difference in the way children and adults respond to the treatment.
- CAdults respond 94% better than children

Practice Test 5 : Part A – Extract 1 Q(1-12) Answersheet

You hear a pediatrician talking to a mother about her baby. For questions 1-12, complete the notes with a word or short phrase.

- Patient:Alex Johnson

  Patient's age:1 month old

  Background

  Second child

  Full term baby

  Mother's pregnancy: without **1)** _____

- Weight at birth: Below **2)** _____ kilos

- Family history: **3)** _____ and diabetes

- Current Condition of of Patient

  Irregular sleep pattern

  Yellow eyes: prolonged jaundice

  Condition is getting **4)** _____

- Need to be checked for **5)** _____

- Suspected that **6)** _____ remains in the liver

- Needs to check for direct bilirubin concentration

  Possibly idiopathic neonatal **7)** _____ or biliary atresia

- **8)** _____ was broken - not due to a **9)** _____ but mother's action in diaper change

- Patient is irritable

  Normal for temperature, respirations and heart rate

  Has **10)** _____ spleen and liver

- Next Steps

  Liver biopsy

  11) _____ of the liver

- Specialist required: **12)** _____

  Check Vitamin D concentration

Practice Test 5 : Part A – Extract 2 Q(13-24) Answersheet

You hear an occupational therapist conducting an assessment of a patient named Josh Edwards.

- Patient:Josh Edwards

  Reason for Asessment:

  OT assessment of home **13)** _____

- Background

Injuries caused by **14)** _____

- **15)** _____ ankle significantly injured

- On-going treatment: **16)** _____

- Current Condition

  Reduced mobility

Reliant on crutches

Affected leg remains **17)** _____

- **18)** _____ visible on affected ankle
- Necessity of keeping the leg**19)** _____
- Existing home furniture not supportive of transfers

  Dependent on others for physical help

  Pain reported in other parts: spine and **20)** _____
- Equipment Recommendations

  Requires special chair

  Sit-to-stand transfer essential

21) _____ in new equipment is necessary

- **22)** _____ can help with alignment
- For social health, place new equipment in **23)** _____
- Consider personal tastes when choosing equipment
- Equipment must also meet **24)** _____ requirements

For questions 25 to 30, choose the answer (A, B or C) which fits best according to what you hear. You'll have time to read each question before you listen. Complete your answers as you listen.

- 25

You hear a morning briefing on a ward

How does the doctor decide on the next steps?

- ABy looking at the patient's medical history
- BBy looking at patient's symptoms and exam
- CBy looking at a scan of patient's abdomen

- 26

You hear a trainee nurse asking a mentor for advice.

Why does the trainee ask his mentor for advice?

- ATo confirm and support possible diagnoses
- BTo help him consider other possibilities like HIV
- CTo explain to him what he should do next

- 27

You hear a nurse talking to another nurse about the discharge of a patient.

What does the female nurse tell the male nurse to prioritize?

- AThe right of the patient to receive non-hostile service
- BThe right of the patient to not be judged
- CThe right of the patient to receive care

- 28

You hear a nurse talking about a new education program for parents.

Why is the nurse giving information about the new program?

- ATo get ideas on how to improve the areas of focus
- BTo explain why they are developing this program
- CTo invite members of the staff to join in its development

- 29

You hear a doctor in the A&E discussing a case with a nurse.

What does the nurse confirm to the doctor?

- AThe patient's lack of knowledge about his condition
- BThe patient's response to the current treatment plan
- CThe patient's continued refusal to contact a family member

- 30

You hear a hospice nurse explaining intake protocol for new patients.

The protocol is designed to

- AHelp the patient make decisions about his/her own health care
- BSupport the family of a patient to make decisions about care
- CGive information about the purpose of hospice and palliative care

Practice Test 5 : Part C – Extract 1 Q(31-36) Answersheet

You hear an interview about career development in occupational therapy.

- 31

What does the speaker say has changed in career development in occupational therapy?

- AThe number of opportunities available to therapists
- BThe quality of the opportunities available to therapists
- CThe number of new therapists entering the field

- 32

According to the speaker, therapists have used their strengths to...

- AImprove the opportunities available in traditional sectors
- BCreate new businesses related to occupational therapy
- CTake the profession into areas outside of traditional sectors

- 33

Why is the change in the curriculum particularly important at this time?

- ABecause the field is currently experiencing significant changes
- BBecause there is less stability in employment and careers
- CBecause more and more people are entering the field.

- 34

What advice does the speaker give to new practitioners?

- ATo wait for the perfect post to come along
- BTo take posts to gain experience in the field
- CTo first pursue further education in the field

- 35

According to the speaker, what career path do the majority of therapists decide to take?

- AA career that is focused on the clinical
- BA career that combines areas of the field
- CA career that combines different sectors

- 36

According to the speaker, continuing professional development can...

- AHelp a therapist to learn about new research developments
- BHelp a therapist to actively contribute to the future of the field
- CHelp a therapist to get from a current post to their ideal post

Practice Test 5 : Part C – Extract 2 Q(37-42) Answersheet

You hear a radiologists talk about the latest trends in her field.

- 37

According to the speaker, the main reason for the increased influence of technology is...

- ARelated to bigger trends that are currently happening.
- BRelated to the pace at which progress is taking place.
- CRelated to the demand for new solutions to problems.

- 38

What example does the speaker give of the current impact of Artificial Intelligence?

- AThe improvement of various types of imaging
- BThe ability to detect changes in images over time
- CThe detection of biomarkers in stroke patients

39

According to the speaker, how can Big Data contribute to the field of radiology?

- AFaster analysis of information, leading to better treatments.
- BMore collection of information, leading to better databases.
- CBetter organization of information, leading to better research.

40

According to the speaker, how does technology change the role that radiologists can play?

- AIt reduces the amount of time that radiologists can spend with patients.
- BIt increases the importance of the radiologist in the care of patients.
- CIt makes it more difficult to devote enough time to the care of patients

41

Interventional radiology is growing due to...

- AThe spread of its techniques to other areas of medicine.
- BThe reduction in the number of diagnostic radiology residents.
- CThe change in the way that radiology residents are trained.

42

Radiologists face challenges because…

- AOther providers don’t trust radiologists with imaging.
- BOther providers prefer to hand over all communication.
- COther providers are reluctant to hand over control.

Practice Test 6 : Part A – Extract 1 Q(1-12) Answersheet

You hear an obstetrician talking to a woman about her pregnancy. For questions 1-12, complete the notes with a word or short phrase

- Patient:Alison Jackson

  Reason for Appointment:

  1) _____

- Prior to Pregnancy

  Menstrual cycles were **2)** _____

- Pregnancy

  Uneventful so far

  Minor complications: some tiredness and **3)** _____

- Patient reports absence of **4)** _____

- Examination shows **5)** _____ are unremarkable

- Patients reports baby's gestational age as **6)** _____

- Unusual observation: fundal height does not correspond to baby's gestational age – should not be the case after **7)** _____ of pregnancy

- Conception date was not **8)** _____

- Patient's uterus size warrants a **9)** _____

- Possible Explanations

Amniotic fluid is more than usual - possibility baby may be born **10)** _____

- Baby's size could be **11)** _____ than expected

- Accuracy of **12)** _____ could be affected by position of baby

Hereditary reasons

Other possibilities, which are more serious

Practice Test 6 : Part A – Extract 2 Q(13-24) Answersheet

You hear a sports podiatrist meeting with a patient referred by his GP.

- Patient:Vance Godfrey

Reason for Appointment:

Ongoing complex **13)** _____ in right foot

- Medical History

Plantar fasciitis: **14)** _____ case

Diagnosed 2 years prior

- Current Condition

Pain under the **15)** _____ of his heel, in centre

- Heel pain usually dissipates within **16)** _____ after touching the ground

Added pain on the side that continues throughout the day

- Recently had three **17)** _____ in a short time period

- Previous Treatment Plan

  Consulted another podiatrist before this

  Application of **18)** _____ was advised

  Roll the heel on a hard object

- Prescribed **19)** _____

  Treatment was unsuccessful

- Further investigation - **20)** _____ was also unremarkable

- Assessment & Treatment Plan

  Possibly two separate conditions present

  Heel pain is consistent with diagnosis

  Possible pathology causing pain around **21)** _____ of heel

- Affecting the **22)** _____ of abductor digiti minimus or the sural nerve

  Another ultrasound required for further investigation

  Start treatment of existing condition

- **23)** _____ to be used to allow heel to rest and recover

- To block sural nerve, can opt to inject **24)** _____ of xylocaine

  Pain monitoring for 24 hours after injection

For questions 25 to 30, choose the answer (A, B or C) which fits best according to what you hear. You'll have time to read each question before you listen. Complete your answers as you listen.

- 25

You hear a training for optometrists.

What does the instructor clarify about the training ?

- AThat it is for optometrists seeking a specialty in the field
- BThat it is for optometrists wanting a review of primary eye care
- CThat it is for optometrists currently still completing their training

- 26

You hear a nurse explaining a new protocol for patient handover. .

The new protocol for patient handover prioritises

- Acommunication between the nurses on the case
- Bcommunication between nurses and patients
- Ccommunication between the nurses and the doctors

- 27

You hear a nurse talking to a patient about his upcoming hospital stay. .

What does she describe to the patient?

- AA written document about eight main areas of care after surgery
- BA written document about how families can help the patient during recovery
- CA written document about what patients can do to be safe

- 28

You hear a surgeon talking about an optional training. .

What does the surgeon explain about the medical problem?

- AIts prognosis is more complicated than that of similar cancers
- BIts prognosis is comparable to that of similar cancers
- CIts prognosis is not as promising as that of similar cancers

- 29

You hear a doctor explaining the side effects of a treatment to a patient. .

What does the doctor suggest the patient do?

- APurchase a thermometer to keep track of his temperature
- BTake the prescribed treatment every four weeks
- CAvoid any infections as much as possible during treatment

- 30

You hear an intern ask a senior doctor about a patient's treatment. .

The senior doctor explains to the intern

- AA series of reasons why this particular treatment is being used
- BA series of ways in which the patient is not responding well
- CA series of ways that a patient could respond to the treatment

Practice Test 6 : Part C – Extract 1 Q(31-36) Answersheet

You hear a presentation about research on allergies in children.

- 31

What does the speaker say has changed in terms of allergies and children?

- AMore children are presenting with food allergies.
- BMore children are presenting with allergies in general.
- CMore children are presenting with an allergy to peanuts.

- 32

According to the speaker, children with this allergy initially

- APresent with a less severe reaction
- BPresent with a more severe reaction
- CPresent with other allergies or conditions

- 33

What is the objective of the first treatment approach being researched?

- To have children build up tolerance by starting to eat a wider variety of foods

- BTo have children build up tolerance by starting to eat small amounts of the allergen
- CTo have children build up tolerance by starting to eat large amounts of the allergen

- 34

How will researchers know how children have reacted to the treatment?

- AThrough observing them for a few hours at the hospital
- BThrough recording them for a few hours at a time
- CThrough phone calls and having them visit the clinic

- 35

According to the speaker, why is the current treatment for this condition difficult for patients?

- ABecause it requires persistent watchfulness
- BBecause many people like to eat foods with the allergen
- CBecause many people are unaware of the condition

- 36

What is one reason for the treatment method used in the second study?

- ABecause many patients do not have the time to add the allergen to their diet
- BBecause many patients have a strong reaction to the taste or smell of the allergen
- CBecause many patients prefer not to make any changes to their current diets

Practice Test 6 : Part C – Extract 2 Q(37-42) Answersheet

You hear a doctor specialising in kidney transplants being interviewed about a new procedure.

- 37

According to the interviewee, what problem was the research trying to address?

- AThe damage done to the transplanted organ during surgery

- BThe amount of time required to complete the transplant
- CThe loss of blood supply to the transplanted organ during surgery

38

What factor did the researcher take into account when choosing which tool to use?

- AThe cost of overall procedure
- BThe cost of the tool itself
- CThe ease of access to the tool

39

How did the placebo procedure differ from the experimental one?

- AThe blood pressure cuff was tightened more
- BThe blood pressure cuff was not tightened
- CThe blood pressure cuff was not used

40

According to the researcher, why was the research done over a number of years?

- ABecause the effectiveness of the kidney declines gradually
- BBecause there were many patients involved in the study
- CBecause it took a long time to analyze all of the information

41

The interviewer says that the procedure has the potential to…

- AExtend the lifespan of all patients by years
- BIncrease the cost to the NHS by quite a lot
- CMake the lives of transplant patients better

42

The research would like to figure out why the procedure...

- AHas not always received positive results

- BHas not been thoroughly researched
- CHas not received a lot of attention by doctors

Practice Test 7 : Part A – Extract 1 Q(1-12) Answersheet

You hear a GP talking to a patient named Alex Summers about a skin problem. For questions 1-12, complete the notes with a word or short phrase.

- Patient:Alex Summers

  Reason for Appointment:

  Hand:**1)** _____

  History of Condition

  Recurring condition

- Current outbreak began **2)** _____ ago

- Current outbreak possibly related to **3)** _____ ingested less than 24 hours prior

  First outbreak was also related to the same medication (taken three days before)

- First outbreak left residual **4)** _____ after healing

- Patient describes pain as a slight **5)** _____

- Possible Diagnosis

  Fixed drug **6)** _____ (immune-mediated mucocutaneous **7)** _____ to medication)

- Complicates diagnosis when patients do not report taking OTC drugs

  Essential to keep record of all drugs taken

- Possible to confirm diagnosis with a **8)** _____ (invasive)
- Another option to confirm diagnosis is a **9)** _____ (less invasive)
- Recommendations

  10) _____ therapy can be used on non-mucosal areas
- **11)** _____ to reduce pain

  Change fever medication

  Monitor reaction to any new medications
- **12)** _____ the condition to any other medical professional prescribing medication

Practice Test 7 : Part A – Extract 2 Q(13-24) Answersheet

You hear a physician in the A&E talking to a patient experiencing abdominal pain. For questions 13-24, complete the notes with a word or short phrase.

- Patient:Mrs Haverson

  Medical History

  Abdominal pain lasting for **13)** _____
- Prescribed ranitidine - not effective

  Pain has been constant

  Accompanied by nausea and has started vomiting

  Also reports feeling **14)** _____

  Pain not associated with food

- Underlying condition: **15)** _____ (on medication: glyburide)

- Current Condition

  Past GP observation: mild **16)** _____ in the mid epigastrium and right upper/lower **17)** _____

- Blood test: Glucose level the only remarkable result of test

- Radiography: **18)** _____ ileus (type of mechanical **19)** _____ obstruction)

- Chronic cholecystitis could have caused an **20)** _____ fistula

- Gallstone could have been **21)** _____ in a narrow area of the intestine (size of patient's gallstone - about 3 milimetres in diameter)

- Quite a rare condition, likely related to patient's **22)** _____

- Treatment

  Recommendation: Surgery

  Control fluid and **23)** _____ imbalances prior to surgery

- Removal of gallbladder to prevent organ **24)** _____
-

Practice Test 7 : Part B – Q(25-30) Answersheet

For questions 25 to 30, choose the answer (A, B or C) which fits best according to what you hear. You'll have time to read each question before you listen. Complete your answers as you listen.

- 25

You hear a conversation between a physician and patient about pain management.

What does the physician want to confirm with the patient?

- AThe management of the underlying condition
- BThe continued management of the patient's pain
- CThe communication with the patient's family

- 26

You hear a trainee doctor asking a senior doctor about a radiography.

The senior doctor explains to the trainee that

- AThere are a wide variety of systems to classify ankle fractures
- BThere is a classification system related to how the fracture occurs
- CThere is a classification system related to how to treat the fracture

- 27

You hear a nurse talking to another nurse about a patient's treatment.

What does the female nurse want the male nurse to correct?

- AHow accurate he is in updating the patient's file
- BHow often he checks on the patient's condition
- CHow compliant he is in following instructions

- 28

You hear part of a training on infection prevention and control.

Why is the training being given at this time?

- ABecause of the volume of patients presenting with symptoms
- BBecause most of the staff have not gone through the training
- CBecause there are new guidelines that everyone needs to know

- 29

You hear a trainee nursing asking a senior nurse for advice.

What does the senior nurse say should be prioritized?

- AThe staffing needs of the ward and hospital
- BThe needs of the patients you are caring for

- CThe needs and safety of each individual nurse

- 30

You hear a conversation between a patient and a dietitian.

The patient made the appointment with the dietitian because

- AOf the recommendation of her GP
- BOf her lack of success in losing weight
- COf her lack of success in eating better

Practice Test 7 : Part C – Extract 1 Q(31-36) Answersheet

You hear part of a training about the use of radiology in patients with headaches.

- 31

Who is the target audience of this training session?

- ATrainees hoping to specialise in diagnostic radiology
- BTrainees currently training in emergency medicine
- CA&E physicians looking to specialise in radiology

- 32

According to the speaker, the first step that should be taken is…

- ATo compare the different sides of the brain for a shift
- BTo determine if emergency surgery needs to take place
- CTo decide on the course of treatment for the patient

- 33

Which of the following is a symptom of the type of stroke mentioned?

- AA bleeding into the space around the brain
- BA sudden onset of a severe headach
- CA ruptured aneurysm

- 34

According to the speaker, how might a patient with ventricular enlargement feel?

- AThe patient may have a headache and see double.
- BThe patient may have a blockage of fluid in the brain
- CThe patient may have a condition like meningitis.

- 35

According to the speaker, why is it generally not necessary to order a CT?

- ABecause most headaches cannot be diagnosed with imaging.
- BBecause most headaches are not severe enough to require a CT.
- CBecause most headaches can be diagnosed without a CT.

- 36

According to the speaker, it is necessary to order a CT when…

- AIt is requested by a patient.
- BA GP is not able to make a diagnosis.
- CA patient reports a change in symptoms.

Practice Test 7 : Part C – Extract 2 Q(37-42) Answersheet

You hear an interview with a dietitian about malnutrition in the elderly.

- 37

According to the interviewee, what is the approach taken by the project?

- ATo involve the family members of the patient
- BTo involve other healthcare professionals in care
- CTo involve the general physician of the patient

- 38

How did the project come to know about the case that the interviewee mentions?

- AThrough the social worker assigned to the patient
- BThrough the care agency of the patient
- CThrough the speech language therapist of the patient

- 39

What social barrier prevented the patient from getting enough nutrition?

  - AShe eats very slowly.
  - BShe doesn’t like to eat alone.
  - CShe doesn’t like to prepare food.

- 40

What changes were made to the patient’s diet?

  - ATo add full fat milk to food and drink
  - BTo replace meals with milky puddings
  - CTo add butter to the soft texture meals

- 41

Which new service did the plan get started for the patient?

  - ASpeech therapy
  - BSocial service
  - CBefriending

- 42

Which part of the plan has been the most successful?

  - AHaving the patient eat with someone else
  - BChanging the texture of the meals
  - CMaking the food cheaper for the patient

Practice Test 8 : Part A – Extract 1 Q(1-12) Answersheet

You hear a general practitioner talking to a new patient called Doug Jones.
For questions 1-12, complete the notes with a word or short phrase.

- Patient Doug Jones

  Occupation: **1)** _____ (retired)

  Having trouble sleeping

- Information Given

  Ignored the sleep problem initially – now experiences it 2-3 times a week

  Described as **2)** _____ by the patient

- Coupled with concentration problem

  Recounted an incident: Could not immediately recognize **3)** _____ from previous workplace

- Cannot cope with **4)** _____ resulting in irritation and frustration)

  Has memory problems as well - forgetting simple words and phrases

- **5)** _____ of physical activity (due to self-isolation)

  Hypertension – on medication s

- Initial Diagnosis: Dementia

Potential due to presence of **6)** _____

- Not the same as general forgetfulness but is a **7)** _____ brain disorder

Long-term result: death

- Affects thinking, behavior, and daily **8)** _____

- More work needed to identify **9)** _____ type of dementia

- Initial Recommendations

  Improve general health

  Increase **10)** _____ of physical activity

- Improve quality of sleep (to eliminate **11)** _____ from the brain)

  Refrain from using sleeping pills

- Intervene to prevent breathing problems while sleeping, because lack of **12)** _____

  will have a negative impact on memory

  Referral

  to a sleep specialists

Practice Test 8 : Part A – Extract 2 Q(13-24) Answersheet

You hear an addiction specialist talking to a new patient called Cheryl Tyson. For questions 13-24, complete the notes with a word or short phrase.

- Patient: Cheryl Tyson

  Reason for Referral:

  Addiction to painkillers

  Chronology of events

  Onset of **13)** _____ pain due to physical work in a warehouse

- Had **14)** _____ - disrupted daily activities

  Initially relied on OTC pain relievers

- Resorted to microdistecomysurgery after **15)** _____ did not help

- Only prescribed opioids post-surgery, including **16)** _____ and opiate mix

  Developed reliance on the painkillerss

- Led to overdosing on painkillers up to **17)** _____ the recommended dosage

  Developed breakthrough pain

- Also started taking up to three **18)** _____ a day

- Complications of Medication

  Severe constipation

  Nausea

  19) _____ swingsto the point of being suicidal

  Fuzziness

- Memory loss (as a result of **20)** _____ years of taking painkillers)

- Treatment Plan

First phase: Learn **21)** _____ ways to manage pain

-

Second phase: Progress to **22)** _____ therapy to learn how to handle stress

- Third phase: Learn to slowly reduce painkillers through private session with a **23)** _____

- Ultimate goal: to no longer see opioids as a **24)** _____ (instead, to use other pain management techniques)

Practice Test 8 : Part B – Q(25-30) Answersheet

For questions 25 to 30, choose the answer (A, B or C) which fits best according to what you hear. You'll have time to read each question before you listen. Complete your answers as you listen.

- 25

You hear a dermatologist talking to a patient about their skin health.

What is the cause of the patient's problem?

- Aher recent change in diet
- Ba change in medication
- Ca new treatment plan

- 26

You hear a nurse talking about a new program to be introduced on her ward.

What will be the programme's main objective?

- AThe programme will provide support for nurses dealing with addiction.
- BThe programme will provide support for patients dealing with addiction
- CThe programme will provide support for community outreach.

- 27

You hear an intern asking a senior colleague about a patient's treatment plan.

What recommendation has the senior colleague made?

- ATo treat Mr Harris' balance issues

- BTo have Mr Harris do light physical activity
- CTo get Mr Harris out of bed as soon as possible

- 28

You hear a surgeon and an internist discuss the treatment plan for a patient.

The female doctor suggests that the patient could

- Ahave internal injuries not detected by the tests done
- Bhave further damage as a result of the fracture
- Cwait for further tests and scans to be run

- 29

You hear members of a hospital discussing a problem in the A&E department.

.

What problem is the department experiencing?

- AThere are more patients with mental health disorders.
- BThere is no mechanism to get patients into treatment.
- CThere are no staff in the hospital who can help the patients.

- 30

You hear a GP talking about opening and managing her own practice.

What does she consider to be the biggest challenge?

- ACreating close relationships with patients
- BBalancing time with patients with other responsibilities
- CMaintaining healthy finances

Practice Test 8 : Part C – Extract 1 Q(31-36) Answersheet

You hear a presentation by a radiologist, Allen Jackson, who's talking about his own work with artificial intelligence

- 31

Why does Allen Jackson give information about how the current system works?

- ATo emphasize how the research can improve upon the current system

- BTo give information that few people are likely aware of
- CTo explain why he decided to take part in this research project

32

How does artificial intelligence compare to the current system?

- AAI is slightly less accurate than the current system.
- BAI compares favorably to the current system.
- CAI results in more women being diagnosed with cancer.

33

How did patients feel about the study?

- AThey were not informed about their participation.
- BThey were not concerned about any aspect of the study.
- CThey were worried about the security of their records.

34

Allen Jackson believes that the results of the research study mean that

- Adoctors can specialize in other areas of medicine
- Bdoctors can spend less time specializing in radiology
- Cdoctors can devote less of their time to diagnosis

35

How might future patients be affected by the research?

- AThey will not notice any difference as a result of the research.
- BTheir stress levels may decrease because of speedier results.
- CFewer patients will likely be diagnosed with breast cancer.

36

Allen Jackson believes that international collaboration is important because

- Ait will help improve the accuracy of diagnosis for women in the UK
- Bit will help to eradicate the disease around the world

- Cit will help to increase positive outcomes for patients

Practice Test 8 : Part C – Extract 2 Q(37-42) Answersheet

You hear a presentation by a specialist thoracic called Sally Grasslake, who's talking about her work with a patient, John Blake, with a rare condition that affects his ability to breathe normally.

- 37

How did Sally come to take John on as a patient?

- AHe was referred by his regular GP.
- BHe was not helped by a series of GPs.
- CHis GP told him to seek a specialist.

- 38

How does John's condition affect his everyday life?

- AHe experiences pain in all areas of his body.
- BHe cannot do common exercises.
- CHe is not able to stand on his own.

- 39

Why was John frustrated by his diagnosis?

- ABecause he felt it was not accurate
- BBecause his symptoms did not match the diagnosis.
- CBecause he was not able to receive medical care.

- 40

What was John's reaction to the response of the GPs he saw?

- AHis outlook on life was negatively affected.
- BHe immediately sought out a specialist for help.
- CHe started to self-medicate for his condition.

- 41

How did Sally react to John’s condition?

- AShe believed his symptoms were caused by something else.
- BShe felt that surgical intervention was necessary.
- CShe thought that more research was necessary.

42

What does Sally suggest about the success of the surgery?

- AThe earlier it is done the more likely it will result in a positive outcome.
- BIt is very difficult to reduce the amount of pain it will cause patients.
- CThe severity of the problem will determine the outcome.

Practice Test 9 : Part A – Extract 1 Q(1-12) Answersheet

You hear a neurologist talking to a patient who has had a traumatic incident. For questions 1-12, complete the notes with a word or short phrase. You now have thirty seconds to look at the notes.

- Patient :Jack

Reason for Assessment

Was hit in the head while playing football

Injury

Sustained 6 hours ago

Impact on **1)** _____ of patient's head (by another player's knee)

- Patient cannot recall incident

Loss of consciousness for **2)** _____ after impact

Patient reports feeling fine after regaining consciousness

- First-line Treatment and Effect

Brought to medical facility

Prescribed **3)** _____ due to generalized motor seizure

- Imaging test done: CT scan (with **4)** _____ results)

- Currently has nausea and a **5)** _____

- **Next steps and probable diagnosis**

Another CT scan, in particular of the **6)** _____

Close observation to prevent rapid deterioration

- Initial diagnosis: **7)** _____ (indicated by lucent period prior to seizure)

- Essentially an **8)** _____ of blood between the skull and outer dural membrane

- Cause by head trauma with a **9)** _____ object

- Common result: skull **10)** _____

- Differential diagnoses: subarachnoid **11)** _____ and subdural hematoma

- **Prognosis**

  Damage is not **12)** _____ due to minimal injury to the brain)

  Needs aggressive treatment

  Better prognosis if treatment commenced early

Practice Test 9 : Part A – Extract 2 Q(13-24) Answersheet

You hear a doctor in the A&E talking to a patient with chest pain. For questions 13-24, complete the notes with a word or short phrase.

- Patient: Mrs Frank

Reason for Coming to A&E:

Acute chest pain

History

Patient reports recurring **13)** _____ chest pain over the last 2 years

Previous episodes usually lasted 1-2 seconds

- Previous position of chest pain: Usually on the left but sometimes **14)** _____

- **Current episode**

Pain has lasted for **15)** _____ hours

- Position of pain: **16)** _____ of chest

  No shortness of breath

  No heart palpitations

- Pain lessens when patient sits up or leans forward

  Medication taken: two **17)** _____ (ineffective)

- Family History and Recent Illness

Father had **18)** _____ in early 50s

Father has high cholesterol level

- Patient's recent illness: **19)** _____ infection

  Started 2 weeks ago

  Lasted 4 -5 days

- Symptoms: sore throat, blocked nose, sneezing and a severe **20)** _____

- **Diagnosis & Treatment**

Likely that the pain is originating in the **21)** _____

Tentative diagnosis: pericarditis with a viral aetiology

- Swelling and inflammation of the **22)** _____ surrounding the heart

  Commonly viral

- Possible causes: Cold or **23)** _____

  Hospital admission not required

- Treatment: Rest and **24)** _____

  Run additional electrocardiogram in 4 days

Practice Test 9 : Part B – Q(25-30) Answersheet

For questions 25 to 30, choose the answer (A, B or C) which fits best according to what you hear. You'll have time to read each question before you listen. Complete your answers as you listen.

- 25

  You hear a conversation between a GP and an office manager about staff burnout.

  What does the GP identify as a negative effect on the practice's patients?

  - AThe quality of care they are receiving.
  - BThe amount of time they have to wait.
  - CThe level of stress they are feeling.

- 26

  You hear a trainee doctor asking a senior doctor about a patient's chest X-ray.

  The senior doctor points out the importance of…

  - AThe markings and tubular shadows in the upper lobes on the chest X-ray.
  - BThe prominence of the pulmonary arteries on the chest X-ray.
  - CThe repeated chest infections that the patient has had.

- 27

You hear part of a training about sports nutrition.

Who is the audience for the training?

- AThe training is for professional athletes training for competitive sports.
- BThe training is for general practitioners involved in helping athletes recover from sports injuries.
- CThe training is for dietitians who may be referred by a general practitioner.

- 28

You hear a morning briefing on a ward.

The doctor explains that a head CT will help…

- ATo eliminate another possible diagnosis.
- BTo assess the neurological deficiencies.
- CTo determine the next diagnostic step.

- 29

You hear part of a training on handovers between nurses.

What does the doctor demonstrate with the example?

- AHow to link two parts of the patient handover.
- BHow to give all necessary information.
- CHow to decide which type of information to include.

- 30

You hear a conversation between a GP and a neurologist.

The GP has contacted the neurologist primarily because…

- AThere was some information left out of the patient's file.
- BShe is very worried about the prognosis of the patient.
- CShe was concerned that the notes contradict the patient's symptoms.

Practice Test 9 : Part C – Extract 1 Q(31-36) Answersheet

You hear an interview about extended roles in dietetics.

- 31

The interviewee says it is important to talk about her profession in order to...

- AMake people aware of what the profession includes because it is a small profession.
- BEncourage future professionals in this small field of medicine.
- CEstablish a clear career path in the profession for the next generation of dietitians.

- 32

According to the interviewee, what types of roles do dietitians now have?

- AThey have maintained the same roles in healthcare that they have always had.
- BThey have fluid and indeterminate roles in modern healthcare now.
- CThey have added roles traditionally held by other healthcare professionals.

- 33

According to the interviewee, what big changes in health care have affected dietitians?

- AEfforts to reduce the cost of healthcare
- BEfforts to make healthcare more modern
- CEfforts to increase job satisfaction

- 34

Why does the interviewee discuss the case of a patient?

- ATo demonstrate the increased complexity of dietitian's cases
- BTo demonstrate the potential of the profession of dietetics
- CTo demonstrate the need for additional training for dietitians

- 35

What is the purpose of four pillars of practice?

- ATo guide the career development of advanced practitioners
- BTo help new dietitians in the field to start their career
- CTo guide the profession of dietetics as practice changes

36

According to the interviewee, what is holding back the profession?

- AThe lack of new professionals in the field
- BThe lack of funding for the extended roles
- CThe lack of funding for basic dietitian services

Practice Test 9 : Part C – Extract 2 Q(37-42) Answersheet

You hear a presentation about the role of general practitioners in the care of older adults.

37

What is the main topic of the research described by the presenter?

- AThe variety of challenges facing general practitioners
- BA particular challenge facing general practitioners
- CA challenge facing the future of general practitioners

38

According to the presenter, why is it a challenge for GPs to diagnose older adults with infection?

- ABecause they often don’t go to their GP for diagnosis
- BBecause they often don’t have this condition
- CBecause they often display unusual symptoms

39

How did the research project gather data?

- AIt invited GPs to a group session to talk about their work.
- BIt invited GPs to individual sessions to talk about their work
- CIt analysed previous comments by GPs about their work

- 40

According to the presenter, what is the role of medications in challenges leading to diagnostic uncertainty?

  - AIt can make it easier to diagnose infections in older patients.
  - BIt can make it more complicated to diagnose infections in older patients.
  - CIt has no measurable effect in diagnosing infections in older patients.

- 41

Why have GPs lost their ability to follow up with patients?

  - ABecause most GPs change practices frequently.
  - BBecause most GPs work less hours than before.
  - CBecause of the increased workload of GPs.

- 42

What limits the use of investigations to diagnose infection in older patients?

  - AThe amount of time that GPs have to wait for results.
  - BThe lack of available tests for this population of patients.
  - CThe pre-existing conditions of the older patients.

Practice Test 10 : Part A – Extract 1 Q(1-12) Answersheet

You hear a GP talking to a patient about recent weight loss. For questions 1-12, complete the notes with a word or short phrase.

- Patient:Mrs Jacobs

Reason for Appointment:

Recent weight loss

Current Condition

Primary cause: Loss of appetite

No intentional effort to lose weight

Total weight reduction **1)** _____ kg in four months

- Associated problem: **2)** _____ (interval after food consumption)

  No reports of stomach pain

- Also reports that **3)** _____ going up stairs or hill

- History

Diagnosed with **4)** _____ two years ago

- 4 months ago: Stopped taking prescribed **5)** _____

- High level of urea indicates **6)** _____

  Low sodium levels

- Low potassium levels (likely causing the reported **7)** _____)

- Examination, Diagnosis and Next Steps

Suspected: Presence of **8)** _____ preventing food leaving the stomach

- Stomach has retained **9)** _____
- Further tests: **10)** _____ and biopsy
- Possible causes: **11)** _____ or cancer in **12)** _____
- Need to wash out the stomach for clarity

Practice Test 10 : Part A – Extract 2 Q(13-24) Answersheet

You hear a doctor in the A&E talking with a patient with persistent headaches. For questions 13-24, complete the notes with a word or short phrase.

- Patient:Nathan Saunders

  Current Symptoms

  Failing vision (described as blurry)

  Reduced urinary output

  Swollen **13)** _____

- Headaches

  Never used to have them

On-going for past **14)** _____ months

Description of pain: **15)** _____

Simple analgesics not working

Previous Treatment

Two months ago: GP diagnosed **16)** _____

Prescribed codeine (not effective)

Prescription changed three weeks ago - patient unsure of medication name (not effective either)

- Current Condition

  17) _____: At crisis level

- Also has **18)** _____

  Also has papilloedema

  Possible renal failure

- Probable diagnosis: **19)** _____

- Next steps

  Reduce blood pressure over next 24 hours (Note: **20)** _____: reduction to prevent arterial thrombosis)

Control fluid intake

Observe for **21)** _____

- Diuretics may not work, possibly start **22)** _____

- Measure kidneys through **23)** _____

- Vision expected to **24)** _____

Practice Test 10 : Part B – Q(25-30) Answersheet

For questions 25 to 30, choose the answer (A, B or C) which fits best according to what you hear. You'll have time to read each question before you listen. Complete your answers as you listen

- 25

You hear part of a training about patients in ICU wards.

What is the effect of the problem that the doctor describes?

- AAn increase in the number of patients in the ICU.
- BPatients are not admitted at all to the ICU.
- CPatients spending more time in the ICU.

- 26

You hear a trainee doctor asking a senior doctor about next diagnostic steps.

Why does the trainee doctor refer to the chest X-ray?

- AIn order to explain a probable cause of the patient's condition.
- BIn order to explain an unlikely cause of the patient's condition.
- CIn order to explain what has already been done with this case.

- 27

You hear part of a training about eating disorders.

Why does the speaker say the training is necessary?

- ABecause there are very few professionals to give this type of training.
- BBecause very few medical programs incorporate this type of training.
- CBecause this type of training has been completely overlooked for many medical professionals.

- 28

You hear part of a training on safety briefings.

What does the speaker say the medical community has learned from outsiders?

- AThe importance of conducting regular safety briefings
- BThe importance of responding to staff feedback
- CThe importance of changing how often briefings are held

- 29

You hear part of a handover between two nurses.

The male nurses asks to go to a different place because…

- AHe doesn’t want to be interrupted during the handover.
- BHe doesn’t want to have problems hearing the other nurse.
- CHe doesn’t want to discuss the case in front of the patient.

- 30

You hear a conversation between a GP and a psychiatrist.

How does the psychiatrist feel about the GPs’ call?

- AHe is relieved because the patient’s file does not talk about the next steps.
- BHe appreciates the call because it will help him to understand the patient better.
- CHe was expecting the call because context has not been included in the file.

00:00

1.0X

Practice Test 10 : Part C – Extract 1 Q(31-36) Answersheet

You hear part of a presentation on training opportunities in dentistry.

- 31

What does the presenter say is his primary motivation?

- AHe wants to inspire dentists to be mentors.
- BHe wants to inspire dentists to do research.
- CHe wants to inspire future practitioners in the field.

- 32

According to the presenter, his approach to dentistry is different because…

- AIt is more focused on the materials than the structure of the tooth.
- BIt is more focused on maintaining the structure of the tooth.
- CIt is more focused on maintaining a strong bond with the tooth.

- 33

According to the presenter, what is a benefit of his approach?

- AFewer severe complications for patients
- BMore advanced training for dentists
- CFewer dental procedures for patients

- 34

The restorative materials used in the approach try to…

- ADecrease the amount of tooth that remains
- BReplicate the bond that natural materials have
- CMimic the natural structures and look of a real tooth

- 35

What is the objective of the second course that the presenter described?

- ATo go over the basic concepts related to the approach described
- BTo review scientific literature related to advanced techniques
- CTo apply basic concepts and techniques previously learned

- 36

How are the two types of dentistry described related to one another?

- AThey both require years of advanced training.
- BThey both focus on preserving the natural tooth.
- CThey both focus on applying traditional methods.

Practice Test 10 : Part C – Extract 2 Q(37-42) Answersheet

You hear an interview about recent innovations in physiotherapy.

- 37

According to the interviewee, what is the role of physiotherapy in health and wellbeing?

- AIt is primarily a way to help three out of five people in the UK with their overall health.
- BIt is primarily a way to address the whole person to manage health long-term.

- CIt is the primary treatment for certain long-term conditions like Parkinson's, asthma, cystic fibrosis, and chronic obstructive pulmonary disease.

38

Why does the interviewer ask about the use of therapy for a particular disease?

- ABecause he was not aware of the use of therapy for this disease.
- BBecause he wants to hear more about an unusual use of therapy.
- CBecause he wants the audience to learn more about the topic.

39

What does the interviewee say physiotherapy can build in all patients?

- AIt helps to aid the clearance of airways and improve lung function.
- BIt helps to increase patients' abilities to bounce back from a disease.
- CIt helps to avoid the need to use health care resources in the long-term.

40

What is mentioned as a change in the role that some physiotherapists play?

- AThey are working more independently to deliver care to patients.
- BThey are working as part of a team to deliver integrated care.
- CThey are working to eliminate the need for other types of care.

41

The interviewee says that robot-assisted therapy is used...

- AMostly independently of therapists.
- BIn conjunction with a trained therapist.
- CMostly outside of healthcare settings.

42

What is the main purpose of the second type of robot-assisted therapy discussed?

- ATo help patients regain the movement of their upper limbs.
- BTo help patients regain the ability to move their fingers.
- CTo help patients regain the use of their lower limbs.

Practice Test 11 : Part A – Extract 1 Q(1-12) Answersheet

You hear a GP talking to a patient about an ongoing problem. For questions 1-12, complete the notes with a word or short phrase.

- Patient :Stephanie

Background

Chief complaint: Battling **1)** _____

Duration of symptoms: Last few months

Effect: Stopped going to the gym

- Diet/Exercise

Exercise: Regular

Smoking: **2)** _____

Drinking: Occasional

- Diet: **3)** _____, but eats dairy and fish

- Recent Symptoms

Reports no pain in the abdomen

Reports no change in **4)** _____ as well

- **5)** _____ is frequent and large

- Possible condition: **6)** _____

- Family History

Deceased grandmother: died **7)** _____

From Ireland

Reported abdominal issues (but no specifics available)

- Next Steps

To check white blood cell count

To check **8)** _____ level

- (as low levels may cause) **9)** _____

To check platelet level

- Possible Diagnosis

Diagnosis: based on family history and symptoms

Possible disease: **10)** _____

- Ireland has **11)** _____ more cases than the rest of UK

Genetic link

Routine blood test is not sufficient to confirm diagnosis

- Extended investigation via **12)** _____ required

Biopsy needs to be carried out

Practice Test 11 : Part A – Extract 2 Q(13-24) Answersheet

You hear a doctor in the A&E talking to a patient presenting with pneumonia.
For questions 13-24, complete the notes with a word or short phrase.

- Patient :Mr. Jacobs

Reason for Admission

Admitted with pneumonia

Presence of other health problems

Medical History

Symptoms in A&E: Episodes of persistent **13)** _____ (past 6 months)

- Also had episodes of stabbing pain on the right side of the **14)** _____
- Pain is exacerbated by coughing, sneezing or taking a **15)** _____
- Has additional issue with **16)** _____ (ongoing for 5 years)
- Food sometimes gets lodged in **17)** _____
- Has had **18)** _____ done (results unremarkable but symptoms worsened)
- Recently, **19)** _____ and vomiting have started after eating
- No relevant **20)** _____

  None smoker, and light drinker

- Observations from Chest X-Ray

  Taken upon admission

  No gastric air bubble

Oesophagus is dilated and **21)** _____

Sign of food spilling into the lung

Possibly located source of respiratory infection

Next Steps

Possible diagnosis: Achalasia of the cardia

Problem is **22)** _____ in nature

- Affects the **23)** _____ at bottom of oesophagus
- Other possible causes: acid reflux, malignant structures or an oesophageal **24)** _____

Practice Test 11 : Part B – Q(25-30) Answersheet

For questions 25 to 30, choose the answer (A, B or C) which fits best according to what you hear. You'll have time to read each question before you listen. Complete your answers as you listen.

- 25

  You hear part of an announcement in a ward.

  Why is the announcement being given at this time?

  - AIt is a routine announcement given before every briefing.
  - BIt is being given because of an accident in the hospital.
  - CIt is being because of the rise of a certain infectious disease.

- 26

  You hear part of a training for nurses on medication errors.

  What is the overall topic of the training?

  - ABeing able to explain the causes of most medication errors
  - BBeing able to acquire knowledge and skill in managing errors
  - CBeing able to demonstrate how to investigate medication errors

- 27

  You hear two nurses discussing a training they took on vaccinations.

  What do the two nurses agree on about the training?

  - AThe usefulness of a review on certain issues

- BThat it was not necessary to include some topics
- CThat not everyone needed to take the training

- 28

You hear part of a conversation between a trainee doctor and a senior doctor.

How does the senior doctor help the trainee doctor to interpret the ECG?

- ABy showing her the different parts of the ECG recording
- BBy asking her to explain the different parts of the ECG recording
- CBy asking her to show him the different parts of the ECG recording

- 29

You hear part of a conversation between two dentists.

What do the dentists disagree about in terms of the training?

- AThe need for more medical training for dentists
- BThe need for more safety training for dentists
- CThe need for more legal training for dentists

- 30

You hear a handover between doctors in the A&E.

Who is most affected by the problems with handovers?

- AThe ambulance drivers who are working overtime
- BThe patients in the community and in the ambulances
- CThe doctors who are treating the patients coming in

Practice Test 11 : Part C – Extract 1 Q(31-36) Answersheet

You hear part of a training for midwives.

- 31

What is the main topic of the training?

- AThe role of probiotics in the gutmicrobiome
- BThe role of probiotics pre- and post-partum
- CThe role of probiotics in functional medicine nutrition

- 32

Why does the speaker say professional development is important?

- ABecause there are so many things to learn about the topic.
- BBecause it is necessary to review topics from initial training.
- CBecause new areas of study are constantly emerging.

- 33

What is the focus of the first topic?

- AThe makeup of the microbiome of human breast milk
- BHarmful species of bacteria found in human breast milk
- CThe supply of beneficial bacteria to the infant gut

- 34

The species of microorganisms mentioned have been shown to…

- AHave positive effects on both mother and infant health
- BHave potentially negative effects on infant health
- CHave overwhelmingly positive effects on infant health

- 35

During the next phase of the training, participants will…

- ADiscuss their thoughts on the training topics
- BReview articles on topics related to the training
- CReview what they already know about the topics

- 36

According to the speaker, what is the role of antibiotics in dysbiosis?

- AThe use of antibiotics can be a cure for dysbiosis.
- BAntibiotics are not generally used for this condition.
- CThe use of antibiotics can be a cause of dysbiosis.

Practice Test 11 : Part C – Extract 2 Q(37-42) Answersheet

You hear an interview with a doctor specializing in youth mental health.

- 37

Why does the interviewer give statistics about the topic?

- ABecause she wants to show under-diagnosed the topic is.
- BBecause she wants to show how it relates to suicide in young people.
- CBecause she wants the audience to the gravity of the topic.

- 38

According to the interviewee, teenagers are vulnerable to mental disease because…

- AThey are not equipped to handle the unique challenges they are facing
- BThey are facing an onslaught of changes in their lives
- CThey are facing peer pressure for greater autonomy

- 39

According to the interviewee, how does technology affect teenagers' mental health?

- AThey are confused between real life and virtual life.
- BThey compare their lives to how they think others are living.
- CThey have more opportunities to bully and be bullied online.

- 40

The interviewee says that teenagers with diagnosed mental health conditions are often…

- ATreated early for their mental health conditions.
- BTreating others poorly because of their condition.
- CTreated poorly by peers because of their condition.

- 41

According to the interviewee, what can be done to prevent mental health conditions in adolescents?

- ABuild healthy habits and supportive communities to support teens
- BLet teens work individually to build resilience

- CInvolve teens in activities in the community and school

42

What is important in treating teens with mental health conditions?

- AIt is important to look for approaches that do not involve medication.
- BIt is important to involve mental health institutions in the treatment.
- CIt is important to define the mental health condition correctly.

Practice Test 12 : Part A – Extract 1 Q(1-12) Answersheet

You hear a GP talking to a patient about an ongoing problem. For questions 1-12, complete the notes with a word or short phrase. You now have thirty seconds to look at the notes.

- Patient:Jake Edwards

  Recent Symptoms

  Ongoing symptoms for a week

  Overall feelings of **1)** _____

- Reduced appetite but has **2)** _____ once

- Reports slight fever during this time

  Reports **3)** _____ in joints

- Joints not visibly swollen

  4) _____ volume is normal

  Bowel movements are unremarkable

- Medical History

  Diagnosed with **5)** _____ (5 years ago)

- Is a **6)** _____ smoker

- Is a heavy drinker

  Is a recreational drug user - marijuana and **7)** _____

- Source of drugs recreational drugs: **8)** _____

Not using IV drugs

- Current Condition

  Signs of liver problem

  Tenderness in right upper quadrant of abdomen

  Elevated **9)** _____

- Pallor is a bit **10)** _____

- Possible Diagnosis & Treatment

Preliminary diagnosis: **11)** _____

- Blood tests required

  Treatment depends on levels indicated in investigations

  Recommended to not consume alcohol or drugs

  Referral to a **12)** _____

Practice Test 12 : Part A – Extract 2 Q(13-24) Answersheet

You hear a doctor in the A&E talking to a patient presenting with back pain.
For questions 13-24, complete the notes with a word or short phrase.

- Patient:Chelsea

  Reason for Admission

  Pain across the back

  Symptoms

  Feeling unwell for past two days

First symptoms: **13)** _____ and backache

- Pain has gotten more severe

  Frequency of vomiting: **14)** _____ in past six hours

- Abdomen tender, particularly in **15)** _____

- Possible Diagnosis

  Symptoms indicate presence of **16)** _____

- Likely condition: acute pyelonephritis

  Caused by ascent of bacteria into the **17)** _____

- Organ affected: **18)** _____

- Likely related to the **19)** _____ patient was diagnosed with 2 months ago

- Next Steps

  Hospital admission required

  Blood and urine **20)** _____ will be taken

- Will start patient on **21)** _____ and medication

- Medication to be monitored depending on the **22)** _____ causing the infection

- **23)** _____ ultrasound required

- **24)** _____ of the urinary tract could be present

Practice Test 12 : Part B – Q(25-30) Answersheet

For questions 25 to 30, choose the answer (A, B or C) which fits best according to what you hear. You'll have time to read each question before you listen. Complete your answers as you listen.

- 25

You hear part of a conversation between two doctors.

Why is the male doctor asking the female doctor for her opinion?

- ABecause he wants to tell her about a diagnosis he has made
- BBecause he wants to know what she thinks the problem is
- CBecause he wants to ask her what his next steps should be

- 26

You hear part of a training for ward leaders.

Why are the people attending this training?

- ABecause they are interested in taking a course on becoming a ward leader.
- BBecause they are experienced ward leaders looking to train other leaders.
- CBecause they are in a training course to become a ward leader.

- 27

You hear a ward briefing on safety.

What does the person say is the purpose of the reporting system?

- ATo know who is making the most mistakes
- BTo know where the team needs improvement
- CTo know who on the team needs improvement

- 28

You hear part of a conversation between two doctors in the A&E.

What do the two doctors agree about?

- AHow busy the A&E has been recently

- BThe number of patients waiting for treatment
- CHow the system is handling mental health

29

You hear part of a conversation between a GP and a physiotherapist.

What does the physiotherapist ask the doctor to do?

- AShow the patient how to do the exercises
- BTell the patient how important the exercises are
- CTell the patient how important exercising is

30

You hear part of a training for GPs.

What kind of course is being described?

- AA blended course for GPs interested in dermatology
- BA traditional face-to-face general education course for GPs
- CA blended, general education course for GPs

Practice Test 12 : Part C – Extract 1 Q(31-36) Answersheet

You hear part of a lecture about an inner ear condition.

31

What is the main topic of the lecture?

- AAn overview of a disease commonly affecting menopausal women in the UK.
- BAn overview of a rather uncommon disease in the UK.
- CAn overview of a rare disease affecting geriatric women in the UK.

32

How is this lecture related to the lectures that came before?

- APrevious lectures talked about the anatomy of the head.
- BPrevious lectures talked about different parts of the ear.

- CPrevious lectures talked about disorders of the outer and middle ear.

33

Which is a common symptom of the disease?

- AA feeling that the world is rotating quickly around you.
- BA feeling that you are going to fall to the ground.
- CA feeling that something is blocking you from hearing.

34

What type of hearing loss is not associated with the disease?

- ANerve damage related to abnormalities
- BA blockage of the transfer of sound waves
- CNerve damage related to an injury

35

What is the most common cause of the disease?

- ALess than adequate of taking in of endolymph
- BOveractivity of the sympathetic nervous system
- CA hypersensitivity to something in the environment

36

What is often seen with hearing loss associated with this disease?

- AIt is sudden in nature and happens in both ears.
- BIt is gradual and it happens in one ear, not both.
- CIt is gradual in nature and happens in both ears.

Practice Test 12 : Part C – Extract 2 Q(37-42) Answersheet

You hear an interview about early detection of breast cancer.

37

How does the interviewer feel about the topic of the interview?

- AHe is very enthusiastic about the topic because of its widespread impact.
- BHe is very enthusiastic about the topic because the breakthrough amazes him.
- CHe is very enthusiastic about the topic because the researcher is going to be famous soon.

38

According to the interviewer, the topic of the research…

- AHas not been made public
- BIs well known to the public
- CIs unbelievable to the public

39

According to the interviewee, how was the blood test developed?

- ABy developing sets of antigens associated with breast cancer
- BBy developing sets of antigens found in healthy people's blood
- CBy developing sets of antigens associated with all cancers

40

What did the researchers notice about the accuracy of their results?

- AThey were unreliable due to differing results with different panels of antigens used.
- BThey increased in accuracy when the number of antigens increased.
- CThey increased in accuracy when the number of antigens decreased.

41

What is being done to further develop the blood test the interviewer is working on?

- AA new study with a larger sample size is being done
- BA new study with other types of antigens is being done
- CA new study with other types of cancers is being done.

42

What concern does the interviewer raise about the use of these tests?

- AHow quickly they can become available to the public
- BHow much the tests will cost patients around the world
- CHow patients will deal with the results of the tests

Practice Test 13 : Part A – Extract 1 Q(1-12) Answersheet

You hear a GP talking to a patient about bruising. For questions 1-12, complete the notes with a word or short phrase. You now have thirty seconds to look at the notes.

- Patient:Mrs. Spivey

  Background

  Bruising that started **(1)** _____ prior

- Patient initially thought bruises were sustained as she **(2)** _____

- Bruises sustained did not**(3)** _____

- Started getting **(4)** _____ bruises

- **Recent Symptoms**

  Patient described bad menstrual cycle

  Previous two periods were **(5)** _____

- Unexpected **(6)** _____ while at work

- **Family History/Lifestyle**

  No recent lifestyle changes

  No family history of **(7)** _____

  Non-smoker

  Consumes alcohol occasionally (social drinker)

- **Physical Examination**

  Multiple areas of purpura

Affected areas: mainly legs and fewer on **(8)** _____

Varying in color from black-purple to yellow

Two mouth bullae detected

- Patient confirms occasional gum bleeding when brushing teeth
- Gum bleeding does not **(9)** _____ as expected

- **Results of Investigations**

Blood test results received

(10) _____ level: lower than normal

Platelets are far below normal

Suspected: spontaneous purpura

- **Next Steps**

Immediate referral to haemotology unit

Urgent for **(11)** _____ required

- Need to reduce possibility of **(12)** _____

Practice Test 13 : Part A – Extract 2 Q(13-24) Answersheet

You hear a GP talking to a patient complaining of increasing tiredness. For questions 13-24, complete the notes with a word or short phrase.

- Patient :Sally Helm

Age: **(13)** _____

- **Symptoms**

Tiredness for the past **(14)** _____

Also reports loss of **(15)** _____

Weight loss: 7 kilos since last check up

Some nausea at times

- Cramping in muscles: on and off since 3 weeks ago

  Some **(16)** _____ of muscles as well

- **Medical History**

  On **(17)** _____ for high blood pressure (20 years)

  Hypertensive controls proving ineffective (BP: 190/110)

  Patient compliant with medication.

- Eyes: **(18)** _____ on occasion

- Sometimes feels **(19)** _____

- **Next Steps**

Further **(20)** _____ are needed (to check urea and creatinine levels)

- Symptoms indicate **(21)** _____

- **(22)** _____ also needed to check for causes

- May need to commence **(23)** _____ if kidneys are damaged

- Treatment for damaged kidneys can be in the hospital or at **(24)** _____

Practice Test 13 : Part B – Q(25-30) Answersheet

For questions 25 to 30, choose the answer (A, B or C) which fits best according to what you hear. You'll have time to read each question before you listen. Complete your answers as you listen.

- 25

You hear part of a ward briefing.

What does the person giving the brief explain is governed by a specific law?

- AWho you can share confidential information with and how
- BWhen and how it is necessary to ask for patient consent
- CWhen it is more important to give data than protect it

- 26

You hear two nurses having a conversation.

What do the nurses agree about?

- AThe value of making patients feel at ease with treatment
- BThat nurses spend a lot of their time talking to patients
- CThat failures in communication are easily overcome

- 27

You hear part of a conversation between a GP and a nurse.

What issue does the nurse want to address?

- AHow patients can confirm their appointments through email
- BHow patients can get more out of their consultation time
- CHow patients can use videos to know more about their condition before their appointment

- 28

You hear part of a training on an addiction treatment program.

Why does the speaker talk about the program?

- ATo show the main objective of the initiative
- BTo show the type of research being done

- CTo show the advances that have been made

29

You hear part of a conversation between a junior and senior doctor.

What is the senior doctor explaining to the junior doctor?

- AHow the night and day teams share their work load
- BHow information about patients is shared within the unit
- CHow to the nurse and consultant divide handover duties

30

You hear part of a conversation between a junior and senior doctor.

What does the senior doctor point out?

- AAnother possible diagnosis for the patient
- BAnother area of concern on the X-ray
- CAnother possible explanation for the X-ray

Practice Test 13 : Part C – Extract 1 Q(31-36) Answersheet

You hear part of an interview about the use of technology in medicine.

31

According to the interviewee, why is this research needed?

- ATo better inform how to treat and diagnose patients
- BTo use new methods to do research in medicine
- CTo help broaden the number of treatments available

32

What is the main focus of the interviewee's research?

- AUsing diagnostic systems to predict patient response to medication
- BUsing new ways of analyzing data to predict patient response to medication
- CUsing a combination of methods to predict patient response to medication

- 33

How did previous investigation inform the current research?

- AIt brought in learning from fields outside of medicine.
- BIt linked brain activity to a person's reaction to medication.
- CIt helped to measure brain activity using resting state electroencephalography

- 34

In what context was the research conducted?

- AIn a small trial with a variety of medications
- BIn a large trial with a variety of medications
- CIn a large trial with one type of medication

- 35

How did the method of analysis compare to other methods?

- AIt performed as well as other methods.
- BIt performed better than other methods.
- CIt performed worse than other methods.

- 36

According to the interviewer, what are future implications for this method of analysis?

- AIt is can be used to predict advanced depression in patients.
- BIt can make treatment for depression more personal.
- CIt can be used to make treatment better for all patients.

Practice Test 13 : Part C – Extract 2 Q(37-42) Answersheet

You hear a presentation about a way to reduce the risk of tooth decay.

- 37

Why does the presenter give statistics about tooth decay?

- ATo help the audience understand the scope of the problem
- BTo help the audience understand the cost of the problem

- CTo help the audience understand possible short-term solutions

38

Why does the presenter introduce the topic of tooth extractions?

- ABecause many people are not aware they take place in a hospital
- BBecause it sets the stage for the presenter's research project
- CBecause it helps to explain why the research was undertaken

39

What kind of intervention was developed for the research project?

- AA planned conversation with parents on prevention strategies
- BA planned program to change bad habits in children's dental health
- CA planned training for dental nurses involved in baby teeth extraction

40

How was the intervention different from the conventional approach?

- AIt focused on parental responsibility over their children's dental health.
- BIt focused on helping parents set reasonable targets for their children's dental health.
- CIt focused on informing parents on how to measure the success of their goals related to their children's dental health.

41

Did the intervention improve health outcomes?

- AIt did not improve health outcomes because children in both groups went back to the dentist.
- BIt improved health outcomes because children needed less dental treatment for cavities.
- CIt improved health outcomes because children did not need fillings as they had less tooth decay.

42

According to the speaker, the most important aspect of the intervention was…

- AThe way it empowered parents to be in charge of their children's dental health.
- BThe way it involved trained dental nurses in educating parents about their children's dental health.
- CThe way it made dental health care more pleasant for nurses, parents and children.

Practice Test 14 : Part A – Extract 1 Q(1-12) Answersheet

You hear a nephrologist talking to a patient. For questions 1-12, complete the notes with a word or short phrase. You now have thirty seconds to look at the notes.

- **Patient** Mr. Jakey

  Background

  Microscopic haematuria

Condition detected **(1)** _____ months ago

Condition detected through urine sample

Condition assessed by a GP

- No previous symptoms/medical issues

Patient describes general health as **(2)** _____

- No family history of **(3)** _____

- **Results of Investigations**

(4) _____ test was ordered by GP

- Haemoglobin, platelets, and **(5)** _____ :Normal

- Blood pressure reading: High at **(6)** _____

  Urea: High

- Creatinine: High

  Gamma-glutamyltranspeptidase: Very high (linked to patient's alcohol consumption of more than **(7)** _____ units per week

-

Immediate action: Patient to **(8)** _____ from alcohol

- **Possible Diagnosis**

High blood pressure and **(9)** _____ indicate chronic glomerulonephritis

- **(10)** _____ of the kidney are likely inflamed

- If unchecked, like to progress to **(11)** _____ renal failure

- Also requires ultrasound to assess the **(12)** _____ (biopsy may be needed as well)

Practice Test 14 : Part A – Extract 2 Q(13-24) Answersheet

You hear a specialist talking to a patient referred by her GP. For questions 13-24, complete the notes with a word or short phrase.

- **Patient** Sheila, final year university student

  Background

  Chief complaint: **(13)** _____

  Symptoms started 10 days prior

  Triggered by climbing stairs

- Symptoms got progressively worse

Patient reports having a **(14)** _____ illness before symptoms started

- Reported illness had accompanying symptoms: **(15)** _____ (recovered in 1-2 days)

- Other symptoms: tiredness, **(16)** _____ and chest pain

- **Lifestyle**

  Reduced exercise due to university demands

  Runs 2-3 times a week

  Denies any **(17)** _____

- **Possible Diagnosis**

  Normal **(18)** _____

- and ECG with **(19)** _____

- Tentative diagnosis: **(20)** _____

  Diagnosis fits symptoms and test results

- Viral causes: Coxsackie A and B, echovirus and chicken pox.

  (21) _____ to confirm and investigations

- Predicted severity of suspected condition: **(22)** _____

- Immediate management **(23)** _____

- Prognosis: **(24)** _____ expected to return to normal

Practice Test 14 : Part B – Q(25-30) Answersheet

For questions 25 to 30, choose the answer (A, B or C) which fits best according to what you hear. You'll have time to read each question before you listen. Complete your answers as you listen.

- 25

You hear part of a conversation about a patient’s upcoming discharge.

What is the patient’s concern?

- AHe is concerned about whether he has enough medication at home
- BHe is concerned that his daughter only has one day off to help him
- CHe is concerned about travel arrangements to see his doctor

- 26

You hear a nurse doing a pre-admission assessment.

What has the nurse covered prior to this conversation?

- AThe patient’s concerns about the surgery
- BThe patient’s previous and current condition
- CThe patient’s medication and changes to it

- 27

You hear part of an information session for the public about when to go to the A&E.

Why is the A&E not a replacement for a person’s GP?

- ABecause the GP has more resources and time for the patient.
- BBecause the GP is aware of a patient's prior conditions.
- CBecause the GP can make referrals for specialised care.

- 28

You hear part of a training for dentists about easing dental fear.

According to the speaker, what should be the priority of the dentist?

- ATo make a patient feel comfortable and in control
- BTo help a patient get access to treatment quickly
- CTo work with patients with a variety of needs

- 29

You hear part of a training for junior doctors.

The series of training sessions will develop...

- ASkills that are important for successful meeting management.
- BSkills that are not typically included in their previous training.
- CSkills that are typically developed later in a doctor's career.

- 30

You hear part of a ward briefing on a mental health unit.

What is the reason for the changes on the ward?

- AThe mismatch between the number of mental health patients and the current capacity
- BThe increasing number of mental health patients visiting the A&E
- CThe shortage of nurses available who are able to work in other ward areas

Practice Test 14 : Part C – Extract 1 Q(31-36) Answersheet

You hear part of an interview about problems that junior doctors face.

- 31

According to the interviewee, what is one of the symptoms of the problem being discussed?

- AThe number of people who chose not to become a doctor
- BThe number of doctors choosing not to practice medicine
- CThe number ofdoctors who do not progress in their career

- 32

According to the interviewee, what is a solution to the high rate of suicide?

- ARecognize that junior doctors are at an increased risk of low morale, stress and suicide
- BReduce the work-related pressure on junior doctors so that they have room to learn and reflect
- CEducate junior doctors so that they know they should not be ashamed if they are stressed

- 33

What is the reason mentioned for junior doctor resignations?

- ALack of engagement between junior doctors and the rest of people in the system
- BLack of experience by junior doctors on how to work within the system
- CLack of acknowledgement for the passion and contribution of junior doctors

34

Why are junior doctors not becoming involved in research and leadership?

- ABecause junior doctorsdo not have enough experience to lead research.
- BBecause other more senior doctors are reluctant to release leadership roles.
- CBecause the skills of junior doctors are diverted to meeting the need of providing care.

35

What is an example of a positive change being made?

- AJunior doctors becoming more involved in problem solving.
- BJunior doctors becoming more involved in focus groups.
- CJunior doctors becoming more involved in trainings.

36

How could current educational requirements be improved?

- AThey could be made more easily available online.
- BThey could be standardized for all junior doctors.
- CThey could be made less rigid and more practical.

Practice Test 14 : Part C – Extract 2 Q(37-42) Answersheet

You hear a presentation about a new infectious disease.

37

According to the presenter, what is the original transmission pattern for this type of virus?

- AIt is transmitted from humans to animals.
- BIt is transmitted from animals to humans.
- CIt is transmitted from human to human.

38

What was a common initial symptom of the first disease discussed?

- AA dry cough
- BPneumonia
- CHigh fever

39

What was the origin of the second disease discussed?

- AThe origin is unknown at this time.
- BThe origin is a large mammal.
- CThe origin is a small mammal.

40

How has the spread of the disease changed?

- AIt is currently being spread between humans who had contact with animals.
- BIt is currently being spread between humans who have traveled to the affected region
- CIt is currently being spread between people who are not sure how they were infected.

41

How is the new disease different from the other disease discussed?

- AIts mortality rate is much lower than those diseases.
- BMost people do not need special treatment to recover.
- CIts infectiousness is much lower than those diseases.

42

How is the new disease similar to one of the other diseases mentioned?

- AThere is no vaccine available.
- BThere is no treatment available.
- CThere are few new cases.

Practice Test 15 : Part A – Extract 1 Q(1-12) Answersheet

You hear a GP talking to a patient about her pregnancy. For questions 1-12, complete the notes with a word or short phrase.

- Patient:Maria

Reason for Appointment:

Routine pregnancy check at **(1)** _____

- **Medical History**

  Previously **(2)** _____ male child (8 years ago)

  No other pregnancies

- No history of **(3)** _____

- **Family History**

  Type 2 diabetes

  First degree relative with condition: **(4)** _____

- **Examination**

  Pregnancy weight gain

  Urine dipstick test

  Detected: **(5)** _____ (high sugar level)

- No evidence of **(6)** _____

- At risk for **(7)** _____

- **Next Steps and possible treatment**

Requires **(8)** _____

- Self-monitoring of **(9)** _____

  Dietary & insulin therapy

- **Potential effects on Baby & Mother Baby**

  Possibly **(10)** _____ than normal

- Increased chance of **(11)** _____

  Future development of types 2 diabetes mother

- May get **(12)** _____

  Diabetes may not go away after delivery

Practice Test 15 : Part A – Extract 2 Q(13-24) Answersheet

You hear a GP talking to a woman about heavy menstrual bleeding.

- Patient:Mrs Peters

  Reason for Appointment

  Menorrhagia, heavy periods

  Interrupting her daily life

  Worried about absence from **(13)** _____

- **Medical History**

Menstruation began at **(14)** _____ (regular cycles)

- **(15)** _____ started 7 days prior

- No issues with **(16)** _____

  No spotting

- Married over last 3 years **(17)** _____ with one partner since)

  No history of STI

- Stopped **(18)** _____ (the pill) 6 months ago

- Normal result for last **(19)** _____ (2.5 years ago)

  No recent changes in health

- Not on any **(20)** _____

- **Diagnosis**

  Likely condition: **(21)** _____

- Possible cause: **(22)** _____ (although unlikely due to patient's age)

- Investigations

  Pregnancy test

  Blood tests

  (23) _____ to eliminate common causes

- **Suggested Treatment**

  Reason for suggestion: Patient is trying to conceive

Treatment option: Tranexamic acid (because it is a treatment) **(24)** _____

Practice Test 15 : Part B – Q(25-30) Answersheet

For questions 25 to 30, choose the answer (A, B or C) which fits best according to what you hear. You'll have time to read each question before you listen. Complete your answers as you listen.

- 25

You hear a nurse briefing her colleague about a patient.

What does she warn her colleague about?

- AThe patient may later need additional assistance in breathing.
- BThe patient may have something more than community-acquired pneumonia.
- CThe patient may have been put on the wrong medication since test results are not out.

- 26

You hear a ward leader talking to the nursing staff

He says that not reporting errors make?

- AEfforts to study errors more difficult
- BEfforts to identify errors less voluntary
- CEfforts to reduce errors less effective

- 27

You hear part of a morning briefing on a hospital ward.

What is the plan for the patient today?

- AHer diagnosis is still waiting to be confirmed.
- BShe will be transferred to a less specialised unit.
- CA social worker will come to talk with her family.

- 28

You hear part of a post-surgery follow-up at a GP practice.

What does the patient want to know about?

- AThe cause of the pain in his belly.
- BThe time period before resuming activity.

- CThe reason he still needs to be taking it slow.

29

You hear a trainee doctor telling his supervisor about a problem he had with a patient.

The trainee feels that the cause of the problem was…

- AThe patient's negative reaction to the procedure.
- BA lack of familiarity with the procedure being done.
- CThe amount of treatment the patient has received.

30

You hear a doctor talking to an athlete with a painful arm.

What is the patient concerned about?

- AThe pain getting worse if he doesn't warm up.
- BThe pain not caused by a triggering event.
- CThe pain interfering with his bowling.

Practice Test 15 : Part C – Extract 1 Q(31-36) Answersheet

You hear part of an interview with a doctor called Dr Ellen Samuels, an expert on Lyme disease.

31

Why does Dr Samuels say the rate of Lyme disease has increased?

- ABecause more patients and doctors are reporting infections
- BBecause of changes in human behavior and the environment
- CBecause of more ticks in different regions of the country

32

Dr Samuels says that transmission of the disease to humans requires...

- AAny type of body fluids from human beings
- BA tick infected with the bacterial pathogen
- CAn animal host to infect other animal hosts

- 33

Dr Samuels says that Lyme disease is a challenge to detect because…

  - AThere are no tests to detect the bacteria responsible for the disease
  - BThe bacteria responsible for the disease only attacks lymph nodes
  - CEvidence of the disease disappears from the bloodstream quickly

- 34

What does Dr Samuels say a person should do if they find a tick?

  - AThe person will need antibiotics to prevent the disease if the tick is attached.
  - BThey may need antibiotics, depending on the amount of time that has passed.
  - CThey will need to get a diagnosis before seeking treatment for the disease.

- 35

What problem does Dr Samuels identify with current diagnostic tests?

  - AThey are not accurate for Lyme disease that is detected early
  - BThey are not accurate for all types of antibody responses
  - CThey are not accurate for certain types of individuals

- 36

What is Dr Samuel's place of work doing about the problem?

  - AThey are working to improve existing diagnostic tests to detect Lyme disease.
  - BThey are working to understand how a person's DNA responds to the disease.
  - CThey are working to improve the effectiveness of current treatment of the disease.

Practice Test 15 : Part C – Extract 2 Q(37-42) Answersheet

You hear a psychiatrist called Dr Matthew Andrews giving a presentation to a group of GPs.

- 37

Matthew Andrews says that GPs are not providing mental health services because

- AAdolescents do not visit GPs on a regular basis
- BAdolescents with mental illnesses visit specialists
- CGPs do not have the required training in the area

- 38

What does Matthew Andrews say is the most effective way to train GPs?

- AProgrammes focused on educational theories
- BProgrammes involving GPs working with specialists
- CProgrammes set in psychiatry or paediatric settings

- 39

How were the joint appointments set up?

- APer the request of the patient and family
- BPer the request of the attending GP
- CPer the request of the consultant

- 40

What was the objective of the joint appointments?

- ATo come to a diagnosis for the patient
- BTo initiate contact with the parents of the patient
- CTo decide on next steps for the patient

- 41

Matthew Andrews says that GPs now report feeling…

- AMore comfortable dealing with certain mental issues
- BMore comfortable working with outside consultants

- CMore comfortable talking to parents about these issues

42

Matthew Andrews says that child psychiatry specialists describe…

- ALearning more about another area of medicine outside their specialty
- BLearning more about children and adolescents with psychological problems
- CLearning more about how to handle consultations in a clinical setting

Practice Test 16 : Part A – Extract 1 Q(1-12) Answersheet

You hear a doctor in the A&E talking to a man who collapsed on the beach. For **questions 1-12**, complete the notes with a word or short phrase. You now have thirty seconds to look at the notes.

- Patient:Mr Phelps

  Taken to the hospital by ambulance

  Fell on the beach, while walking dog

  Did not display **(1)** _____

- **(2)** _____ for about half a minute

- Witness account: Patient was not confused once recovered

  Possible trigger: Ran up **(3)** _____ before collapsing

- Injuries sustained: **(4)** _____ on right shoulder from hitting rock but no

  injury to the **(5)** _____

- **Overall Health**

  Reduced: **(6)** _____ of exercise due to lack of 7) _____

- Previous similar episode: Happened after a **(8)** _____

- Resting heart rate: **(9)** _____ bpm

- Blood pressure elevated despite being on **(10)** _____

  Does not drink or smoke

Denies being on **(11)** _____

- **Further tests**

ECG and **(12)** _____

Practice Test 16 : Part A – Extract 2 Q(13-24) Answersheet

You hear a GP talking to a man about back pain. For **questions 13-24**, complete the notes with a word or short phrase. You now have thirty seconds to look at the notes.

- Patient:Thomas

Reason for Appointment

Incident causing sudden back pain: **(13)** _____

Patient heard a click before the pain started

Initial pain was sharp

- Now pain is described as a **(14)** _____
- Pain will become sharp when patient attempts to **(15)** _____
- Self-medicated for pain and also applied **(16)** _____ but little relief so far

  No other symptoms reported

- **Medical History**

  Takes **(17)** _____ for high blood pressure

- No **(18)** _____ for last several years

- **Clinical Examination**

  Observation: Gait is a bit **(19)** _____

- Tenderness in **(20)** _____

  Limited range of movement

- No**(21)** _____

- **Recommendations/Next Steps**

  Observe condition for a spell

  Medical leave for one week to rest

  Patient to totally refrain from**(22)** _____

- Requires **(23)** _____ assessment

  Pain medication: Codeine

- Appointment in two weeks if condition **(24)** _____

Practice Test 16 : Part B – Q(25-30) Answersheet

For questions **25 to 30,** choose the answer (**A, B** or **C**) which fits best according to what you hear. You'll have time to read each question before you listen. Complete your answers as you listen.

- 25

  You hear part of a training about prescribing for junior doctors

  What does the presenter clarify about certain types of medication?

  - AThat the same system is used for medical and legal guidance.
  - BThat a different system is used for medical and legal guidance.

- CThat a similar system is used for medical and legal guidance.

26

You hear a junior doctor asking about how to write a discharge summary

The senior doctor advises the junior doctor to prioritise

- ABeing very thorough and technical in the summary
- BUsing patient friendly language in the summary
- CFocusing on next steps and consequences in the summary

27

You hear part of a conversation between nurses about a patient with dementia

The male nurse suggests that the female nurse...

- ALearn about communicating with all types of patients.
- BAcknowledge how the patient is feeling and why
- CHelp the patient to understand the facts of the situation

28

You hear part of a ward briefing on patient interactions

It is important to try to identify how a patient is feeling because...

- APatients may not be able to identify emotions for themselves.
- BIt gives the patient a way to get the negative energy out.
- CIt gives more information about how to direct the conversation.

29

You hear a senior doctor discussing with a junior doctor how to interpret a test

What aspects of the test does the junior doctor describe

- AThe purpose of the test and its primary elements
- BThe reason for doing the test and potential problems
- CThe types of pathologies that can be identified

30

You hear a doctor in the A&E talking to a medic about a patient with opioid overdose.

What does the medic explain to the doctor?

- ARelevant aspects of the patient's medical history
- BPatient's current condition and treatment administered
- CPatient's unexpected reaction to treatment administered

Practice Test 16 : Part C – Extract 1 Q(31-36) Answersheet

You hear part of a training for junior doctors about explaining immunisations.

.

- 31

The presenter warns the audience about…

- AFeeling overwhelmed by the number of topics covered.
- BFeeling uninformed about the topic being covered.
- CFeeling unprepared because of high expectations.

- 32

Why is it important to be open to parent's concerns during the consultation?

- ATo make sure parents understand the importance of the topic.
- BTo make sure parents do not feel irritated and disengaged.
- CTo make sure parents will keep an open mind and be cooperative.

- 33

What kind of information should be provided about individual vaccines?

- AThe number of patients who have received it so far.
- BThe low incidence of side effects of the vaccines.
- CThe main disease that it prevents.

- 34

It is important to explain to parents about what happens before the vaccination because…

- AIt will allow them to have more confidence in their health practitioner.
- BIt will allow them to feel more at ease during the appointment.
- CIt will allow them to feel more at ease with possible side effects.

35

When giving information about side effects, the doctor should also…

- ATell parents how to contact their health care professional.
- BTell parents what to do to make the child feel better
- CTell parents about research related to different side effects

36

How should doctors deal with incorrect information related to vaccinations?

- AThey should assure parents that the vaccination programme is very safe.
- BThey should thoroughly explain the source of the misinformation.
- CThey should give basic information about the source of the misinformation.

Practice Test 16 : Part C – Extract 2 Q(37-42) Answersheet

You hear an interview with Dr. Laura Sanders, an Alzheimer's researcher.

37

Dr. Sanders says that the research into the drug had been stopped because…

- AOf poor results in the early stages of trials.
- BOf problems with data analysis during the trials.
- COf problems with how the trials were conducted.

38

Dr. Sanders points out that research for the drug was…

- AAt a very early stage in development.
- BAt an advanced stage in development.
- CNear the end of development.

39

Newly examined results showed that…

- APatients on all doses experienced a decrease in decline.
- BPatients on elevated doses experienced a decrease in decline.
- CPatients on elevated doses experienced an increase in decline.

40

Dr. Sanders states that this research supports the theory that…

- AThe presence in certain proteins is indicative of Alzheimer's.
- BThe decrease in certain proteins is indicative of Alzheimer's.
- CThe removal of certain proteins can reverse Alzheimer's.

41

Analysis of the data from the trials has been complicated by…

- ANew data from other studies into Alzheimer's
- BThe attitudes of researchers toward the trial
- CAdjustments made during the clinical trials

42

How does the scientific community feel about the research?

- AThere is overwhelming enthusiasm about the results.
- BThere is a general lack of interest in the results.
- CThere is some concern about the latest round of results.

Practice Test 17 : Part A – Extract 1 Q(1-12) Answersheet

You hear a doctor in a hospital talking to a patient presenting with jaundice. For **questions 1-12**, complete the notes with a word or short phrase. You now have thirty seconds to look at the notes.

- Patient:Marie Stevens

  Reason for Referral:

Jaundice lasting approximately **(1)** _____

Other Symptoms

Stool: **(2)** _____ in colour

- **(3)** _____ Normal in amount

  Darker in colour

- **Stomach pain**

  Right **(4)** _____

- Intermittent but has lasted**(5)** _____

- Sharp pain increasing in**(6)** _____

- **(7)** _____ large meals

- **Medical History**

  Two pregnancies

  Surgery on **(8)** _____

- No**(9)** _____

  Medication for blood pressure

- Not a candidate for **(10)** _____

- **Investigations**

  Full blood count

  Liver Function

  Serum lipase & amylase (to eliminate **(11)** _____

- Coagulation Screen

  (12) _____ after results

Practice Test 17 : Part A – Extract 2 Q(13-24) Answersheet

You hear a doctor in the A&E talking to a man with blood in his urine. For **questions 13-24**, complete the notes with a word or short phrase. You now have thirty seconds to look at the notes.

- Patient:Mr Andrew Yates, 55

  Blood in urine

  Symptoms

  (13) _____ haematuria

- Turned from **(14)** _____ to dark red in last 24 hours

- Difficulty **(15)** _____

- **(16)** _____ in urine

- No **(17)** _____ or similar feeling

  No back pain

- **Family History**

  No **(18)** _____ bladder or renal cancer

- **Medical & Social History**

  (19) _____ on medication

- Heavy **(20)** _____

- **Possible Diagnosis**

  At increased risk for **(21)** _____

- **Next Steps**

  Bladder washout and **(22)** _____

- by way of a **(23)** _____

- Urine culture to be collected: To check for **(24)** _____ cause

  Blood test: To check haemoglobin levels (may require transfusion

  Bladder scan: To check for clot retention

For questions **25 to 30,** choose the answer (**A, B** or **C**) which fits best according to what you hear. You'll have time to read each question before you listen. Complete your answers as you listen.

- 25

You hear part of a conversation between a junior and senior doctor.

What is the senior doctor's stand on painkillers in this case?

- ATriptans can sometimes be ineffective for severe headaches.
- BThey can sometimes be sufficient in the management of the condition.
- CA variety of painkillers can be used to as prophylactic options.

- 26

You hear part of a training on the classifications of strokes.

What does the presenter clarify about how diagnosis is determined?

- AThere is a reliance on the results from investigations.
- BThere is a reliance on the patient's clinical history.
- CThere is a reliance on observation of the patient.

- 27

You hear part of a ward briefing about documentation of results.

What does the ward leader warn the team not to forget?

- AThe duration of the last therapy.
- BThe absence of abnormalities.
- CThe details related to treatment.

- 28

You hear part of ward briefing on history taking and information giving.

What does the speaker say to prioritize during this type of patient interaction?

- AGiving the patient the opportunity to express themselves.
- BGiving the patient the opportunity to discuss medical decisions.
- CGiving the patient the opportunity to ask for medical advice.

- 29

You hear a dermatologist reporting results to a GP.

What does the dermatologist explain to the GP?

- AA possible diagnosis for the patient's lesion.
- BThe risk factors presented by the patient.
- CThe aspects checked during the appointment.

- 30

You hear two nurses discussing handwashing.

The nurses agree that...

- APeople have improved how they wash their hands.
- BPeople are better at training others to wash their hands.
- CPeople know what type of cleaning liquid to use.

Practice Test 17 : Part C – Extract 1 Q(31-36) Answersheet

You hear part of a training for A&E doctors about a type of suture.

- 31

Why does Dr Paduh refer to the previous training?

- ASo that the trainees know that he is not repeating similar content from a previous training.
- BSo that the trainees can use their previous knowledge to good use in the current training.
- CSo that the trainees can concentrate on the new information and worry less about what they already know.

- 32

Dr Paduh says that the vertical mattress stitch is often used when…

- AA wound is located in a place where scarring is noticeable
- BA wound is located where skin is particularly tense
- CA wound is located where skin tends to turn outwards

- 33

What is a reason not to use the vertical mattress stitch?

- AIt is difficult for doctors to learn to do it well.
- BSuccess depends on the ability of the doctor.
- CIt requires a lot of time to set up the procedure.

- 34

Dr Paduh warns that a wound cannot be closed until…

- AA booster of necessary vaccines is administered
- BAn X ray is performed to check for fractures
- CThe limits of the wound are thoroughly cleaned

- 35

Dr Paduh says the symmetry of loops is key because...

- AIt will decrease the chances of excessive scarring
- BIt will result in alignment of the edges of the wound
- CIt will decrease the amount of swelling that occurs

- 36

Dr Paduh says pulling on the knot excessively will result in…

- AA higher risk of scarring near the edges wound
- BA turning out of the edges of the wound
- CA lack of opposition of the edges of the wound

Practice Test 17 : Part C – Extract 2 Q(37-42) Answersheet

You hear an interview with Youyou Tu, a researcher specialising in malaria.

- 37

The interviewer mentions Tu's background in order to…

- AEmphasise the significance of Tu's achievement.
- BEnsure that the audience have clear expectations of the interview.

- CPrepare the audience for Tu’s lack of official medical credentials.

38

Tu says that she was motivated to study medicine because…

- ATuberculosis took away two fruitful years of her life.
- BTuberculosis helped her empathise with others.
- CTuberculosis gave her time to think about her future.

39

What was the focus of Tu’s medical education?

- AFinding a cure for bacterial infections such as tuberculosis.
- BUnderstanding the use of naturally-found compounds.
- CClassifying different types of traditional medicine.

40

What was a turning point in Tu’s professional career?

- AWhen a war in a neighboring country started.
- BWhen a new drug was developed for malaria.
- CWhen her government started a new project.

41

Why did Tu’s team start doing research into old texts?

- ABecause the texts had been useful in the past.
- BBecause they had run out of other options.
- CBecause malaria had been previously cured in China.

42

Tu mentions language as an obstacle to…

- AThe identification of the active component.
- BThe development of an effective treatment.
- CThe spread of theTu’s team’s research findings.

Practice Test 18 : Part A – Extract 1 Q(1-12) Answersheet

You hear a doctor in the A&E talking to a patient named Alice Knowles who has come in because of haematemesis. For **questions 1-12**, complete the notes with a word or short phrase. You now have thirty seconds to look at the notes.

- Patient:Alice Knowles

  Started to feel sick and **(1)** _____

  Vomited blood

  Colour of blood: Described as fresh and red

- Volume: Approximately a **(2)** _____

  Passed out

  First known episode

- **Other Symptoms**

  No changes in **(3)** _____

- **Medical History**

  Ongoing **(4)** _____

- Takes **(5)** _____ daily

- **Treatment & Investigations**

  Not **(6)** _____ stable

- Blood test & **(7)** _____

- **(8)** _____ fluids via IV

- Purpose of blood test: To check

  (9) _____ & urea levels ECG

- **Clinical Assessment**

  Blood pressure/low

  (10) _____ /high

- **Possible Diagnosis & Recommendations**

  Gastrointestinal bleeding

  Possible causes - **(11)** _____ & oesophageal erosions

- **(12)** _____ use /risk factor

Practice Test 18 : Part A – Extract 2 Q(13-24) Answersheet

You hear **a physician in the A&E talking to a patient who woke up with one side of her face drooping**. For **questions 13-24**, complete the notes with a word or short phrase. You now have thirty seconds to look at the notes.

- Patient:Mrs Shepherds

  Current Symptoms

Weakness on **(13)** _____ side of face

- **(14)** _____ normal, no numbness

- Is able to see, and swallow both **(15)** _____

- Clear speech, no **(16)** _____ or problems with words

- No balance issues or **(17)** _____

- **Recent History**

  No recent **(18)** _____

- Medication for **(19)** _____

- **Likely Diagnosis**

Other symptoms & **(20)** _____

- indicate **(21)** _____

- A type of paralysis caused by **(22)** _____

- **Prognosis & Management**

  Most patients recover in less than **(23)** _____

- Important to keep eye lubricated as condition impacts **(24)** _____

Practice Test 18 : Part B – Q(25-30) Answersheet

For questions **25 to 30,** choose the answer (**A, B** or **C**) which fits best according to what you hear. You'll have time to read each question before you listen. Complete your answers as you listen.

- 25

You hear part of a conversation between a junior and senior doctor on how to interpret the results of an investigation.

What does the senior doctor clarify about the results of the investigation?

- AThat the results clearly point to portal hypertension
- BThat the results are not sufficient to come to a definite diagnosis yet
- CThat the medical history allows them to rule out cirrhosis

- 26

You hear part of a training about smoking cessation counselling.

The speaker points out that this approach is better than…

- AOne not focused specifically on this behavior
- BOne used by other types of specialties
- COne focused on patient´s worries and desires

- 27

You hear a doctor going over an upcoming procedure with a patient.

What does the doctor explain to the patient?

- AWhen they can insert the implant
- BHow they will insert the implant
- CWhy they will insert the implant

- 28

You hear part of a conversation between a nurse and a doctor about a patient's medication.

What does the nurse point out about the patient's medication?

- AHe took an analgesic before he was admitted to the hospital.
- BHe depends on his wife to get painkillers from the doctors in the hospital.
- CHe is mixing over-the-counter and prescribed medications.

- 29

You hear two doctors talking about a patient that one is referring to the other.

The doctor referring the patient explains that…

- AThe previous diagnosis was made by a doctor at another practice.
- BThe previous diagnosis was made by a specialist in another field.
- CThe previous diagnosis was made by a doctor who is no longer working.

- 30

You hear a conversation between two ward leaders about administrative duties.

The ward leaders agree that...

- ATheir job responsibilities have changed over time
- BTheir job has become much more difficult over time
- CTheir satisfaction with their job has changed over time

Practice Test 18 : Part C – Extract 1 Q(31-36) Answersheet

You hear part of a presentation by Jessica Stokes on a study related to dietetics.

- 31

Why does Jessica Stokes say it is important to focus on coconut oil?

- ABecause of all of the benefits it is known to have
- BBecause of the recent interest in it
- CBecause of the findings of other research studies

- 32

Jessica Stokes points out that previous studies show...

- AConsumption of coconut oil likely has no noticeable effect
- BConsumption of coconut oil likely has a beneficial effect
- CConsumption of coconut oil likely has a negative effect

- 33

What limitation did previous studies have?

- AThe duration of the study
- BThe methods of analysis
- CThe number of total studies

- 34

Who was not selected to be part of the study?

- APeople living outside of the country
- BPeople with no known medical issues
- CPeople living close to one town

- 35

Jessica Stokes says that before the study…

- ADaily food consumption was evaluated
- BThe amount of exercise was evaluated
- CThe medication history was taken

- 36

Jessica Stokes concluded that future studies should…

- AInclude a larger number of total subjects
- BBe conducted over a longer period of time
- CAllow subjects to choose their own diet

Practice Test 18 : Part C – Extract 2 Q(37-42) Answersheet

You hear a training by Dr James Coffey about a non-surgical procedure.

- 37

Dr Coffey says that the procedure is indicated for patients…

- AWho have any type of severe illness
- BWho are having serious problems with sputum

- CWho are having some respiratory distress

38

Dr Coffey says extra precautions should be taken with patients…

- AWho have an infectious disease
- BWho are constantly coughing
- CWho have trouble coughing

39

Why does Dr Coffey give an example of an interaction with a patient?

- AIn order to demonstrate how to explain the procedure
- BIn order to demonstrate how to deal with difficult patients
- CIn order to demonstrate how the patient might feel

40

What is key to getting accurate results from this investigation?

- AGetting a large specimen from the patient
- BGetting a specimen from deep inside the chest
- CGetting rid of any potential contaminants

41

Dr Coffey offers several tips in order to help patients…

- ARecover quickly after the procedure is over
- BProduce a quality sample of sputum
- CFeel comfortable with the procedure

42

Dr Coffey suggests changing the procedure when…

- AA patient is physically not able to cough
- BA patient is taking certain medication
- CA patient does not want to give consent

Practice Test 19 : Part A – Extract 1 Q(1-12) Answersheet

You hear a doctor in the A&E talking to a patient named Mandy Johnson. For **questions 1-12**, complete the notes with a word or short phrase. You now have thirty seconds to look at the notes.

- Patient:Mandy Johnson

Now feeling more **(1)** _____ than when first came in

- **Description of Episode**

During

Holding head & losing consciousness

Whole body started **(2)** _____

- Made **(3)** _____ sounds and unable to open eyes
- Bruising & **(4)** _____ on face
- **Before**

Severe **(5)** _____ just before

No weakness or numbness

- Episode of **(6)** _____
- No loss of consciousness recently or **(7)** _____

  No head trauma

- **Current Condition**

Daily activities resumed as usual

Mild **(8)** _____ headache & nausea

- Administered **(9)** _____ for nausea
- No reported **(10)** _____ disturbances
- **(11)** _____ neck
- **Medical History**

  No problems or medication

  Smokes **(12)** _____ a day

  Does not drink

  Next Steps

  Head CT

Practice Test 19 : Part A – Extract 2 Q(13-24) Answersheet

You hear **a GP talking to a patient about a diagnosis of Cushing's syndrome**. For **questions 13-24**, complete the notes with a word or short phrase. You now have thirty seconds to look at the notes.

- Patient:Mr Thomas

Symptoms

Weight gain, particularly noticeable in the **(13)** _____ & shoulders

- **(14)** _____ have spread

Wound healing is slow

- Experiencing **(15)** _____ & depression
- Frequently feels **(16)** _____ around other people
- **Investigations Results**

  Urine and blood tests done

24-hour **(17)** _____ cortisol investigation

- Shows above 3x **(18)** _____ of normal
- **(19)** _____ cortisol confirmed Cushing's syndrome
- **Exploration of Causes**

  Patient not on **(20)** _____
- **(21)** _____ Cushing's syndrome
- Tumour of the **(22)** _____

  Problem with adrenal gland
- Investigations to find cause

  Test to detect**(23)** _____

  MRICT

  scan

- **Treatment Options**

  Medications to reduce levels temporarily until **(24)** _____

  Surgery - if tumour found to be present

Practice Test 19 : Part B – Q(25-30) Answersheet

For questions **25 to 30,** choose the answer (**A, B** or **C**) which fits best according to what you hear. You'll have time to read each question before you listen. Complete your answers as you listen.

- 25

  You hear part of a conversation between a doctor and a patient about the results of an investigation.

  The doctor explains that the results of the investigation show…

  - AThe pathogen causing the disease
  - BA combination of coryzal symptoms
  - CThe type of condition the patient has

- 26

  You hear part of a conversation between two doctors about an MRI scan.

  The male doctor asks the female doctor to confirm…

  - AThe severity of the condition
  - BThe possible type of condition
  - CThe direction of the malformation

- 27

  You hear part of a training on suture materials.

  Which problem does the presenter identify?

  - AA lack of options available in relation to this topic
  - BA lack of knowledge about this topic
  - CA lack of confidence in this topic

- 28

You hear part of a conversation between a trainee nurse and a senior nurse.

What does the senior nurse suggest?

- AThe procedure to explain the procedure to the patient
- BTo consult with the patient about the procedure
- CTo change the site of the procedure

- 29

You hear two doctors talking about breaking bad news to a patient.

What do both doctors agree about?

- AThe lack of information makes the situation more difficult.
- BThe way patients react to news makes the situation more difficult.
- CThe type of diagnosis can make the news more difficult to give

- 30

You hear a ward safety briefing about preventing falls.

The ward leader suggests that patients should…

- ABe encouraged to perform exercises in bed first after an operation.
- BBe accompanied when they need to get out of bed.
- CBe given walkers or canes if they want to walk down the hallway.

Practice Test 19 : Part C – Extract 1 Q(31-36) Answersheet

You hear part of an interview with Dr Christina Salem about diabetic patients and respiratory illness.

- 31

What do Dr Salem and the interviewer agree about?

- AHow difficult it can be to get the right information
- BHow difficult it can be to find any information
- CHow difficult it can be to understand the information

- 32

Dr Salem points out that it is not known if…

  - ADiabetics have different outcomes from other patients
  - BDiabetics have an increased risk of becoming ill
  - CDiabetics will experience different symptoms

- 33

According to Dr Salem, what causes diabetics to be at a higher risk of complications?

  - APoor management that increases the infection rate
  - BPoor management that affects blood sugar levels
  - CPoor management that weakens the immune system

- 34

Dr Salem clarifies that the level of risk for different types of diabetes…

  - ADepends more on other health problems than anything else
  - BDepends more on other factors, such as age, than anything else
  - CDepends more on good management than anything else

- 35

Dr Salem says that when contacting a doctor, a diabetic should…

  - AKnow their most recent blood sugar levels
  - BBe able to say how long they have had symptoms
  - CAsk for assistance in getting more insulin

- 36

Dr Salem prioritises getting insulin to those…

  - AWhose supply is being cut off by large manufacturers
  - BWho cannot afford to pay due to financial problems
  - CWho cannot find it because of distribution networks

Practice Test 19 : Part C – Extract 2 Q(37-42) Answersheet

You hear a training by Dr Samuel Adams about suicidal risk assessments.

- 37

Why does Dr Adams say this training is necessary?

- ABecause many doctors avoid interacting with patients in this way
- BBecause of the impact the lack of training is having on patients
- CBecause of the increased number of patients seeking treatment

- 38

Dr Adams prioritises the human connection with patients because…

- AIt will lead to a more-informed evaluation of the patient.
- BIt will allow for a long-term relationship with the patient.
- CIt will give the doctor insight into the patient's thinking.

- 39

According to Dr Adams, which aspect is key to determining the level of impulsivity of the patient?

- AType of self-harm
- BExistence of a trigger
- CEvidence of forethought

- 40

Why might part of the interview be modified?

- AIn order to ask more about the method used
- BIn order to ask more about the current mood
- CIn order to ask more about theoretical next steps

- 41

Dr Adams explains that risks uncovered while taking the social history may…

- AResult in further assessments being done

- BResult in other professionals being brought in
- CResult in patients reacting negatively

42

For the majority of patients, Dr Adams recommends…

- AReferring the patient to specialist
- BPutting together a list of actions points
- CContacting a local support network

Practice Test 20 : Part A – Extract 1 Q(1-12) Answersheet

You hear a GP talking with a woman, Teresa Young, complaining of worsening tiredness. For **questions 1-12**, complete the notes with a word or short phrase. You now have thirty seconds to look at the notes.

- Patient:Teresa Young

Started to feel tired **(1)** _____ prior

- Fell asleep during **(2)** _____ at work

- **Symptoms**

  Sleep

  (3) _____ increased number of hours (from 7 to 14 hours)

- **(4)** _____ of sleep is reported as good

- **Appetite**

  Decreased

  No nausea or **(5)** _____

- **(6)** _____ faster than before

- No change in **(7)** _____

- **Other**

  No recent colds

  Occasional **(8)** _____

- Stressed about work

  (9) _____ but not taking medication for it

- Areas of **(10)** _____ on limbs/torso

- **Investigations**

Symptoms indicate problems with gastrointestinal, **(11)** _____ & cardiovascular systems

- Full blood count & **(12)** _____

  Coagulation studies

Practice Test 20 : Part A – Extract 2 Q(13-24) Answersheet

You hear a doctor in the A&E talking with a woman, Emily Campbell, presenting with chest pain. For **questions 13-24**, complete the notes with a word or short phrase. You now have thirty seconds to look at the notes.

- Patient:Emily Campbell

  Current Symptoms

  Chest pain & **(13)** _____

- Took **(14)** _____ for symptoms

- **Recent Symptoms**

  Sharp, constant pain on **(15)** _____ of chest

- Pain becomes worse after a **(16)** _____

Not able to do physical activity

- No coughing, fever or **(17)** _____

- **Recent Medical History**

  A **(18)** _____

- 3 weeks prior with **(19)** _____

- **Possible Diagnosis**

  At risk for **(20)** _____

- ECG & CT **(21)** _____ to confirm

- **Treatment Options**

  Open pulmonary embolectomy (rare)

  (22) _____ treatment (common)

- Until confirmation, **(23)** _____ heparin will be administered

- Goal is to achieve **(24)** _____

Practice Test 20 : Part B – Q(25-30) Answersheet

For questions **25 to 30,** choose the answer (**A, B** or **C**) which fits best according to what you hear. You'll have time to read each question before you listen. Complete your answers as you listen.

You hear part of a conversation between two nurses about a blood transfusion.

What does the female nurse tell the male nurse to prioritise?

- ABuilding rapport with the patient
- BFollowing protocols closely
- CReviewing procedures regularly

- 26

You hear part of a conversation between a junior doctor and a senior doctor about how to interpret a cardiotocograph.

The senior doctor confirms the….

- AClassification of the pregnancy
- BAbnormality in the heart rate
- CPresence of contractions

- 27

You hear part of a conversation between a nurse and a doctor about an angry patient.

The nurse explains that the patient likely suspects…

- AThat the staff is avoiding treating him
- BThat his spouse doesn't want to see him
- CThat he is going to wait a long time

- 28

You hear part of a training on arterial blood gas interpretation. .

What is the main aim of the training?

- AA review of the basic aspects of a difficult topic
- BAn introduction of a difficult-to-understand topic
- CA way to think about a difficult-to-understand topic

- 29

You hear a doctor taking a medication history of a patient.

What is the doctor explaining to the patient?

- AThe action plan developed during the consultation

- BConcerns about the patient's medication regimen
- CThe best way to contact him after the appointment

- 30

You hear part of a conversation between a junior doctor asking for assistance with a recently admitted patient.

The junior doctor is suggesting the other doctor…

- ATell him how to take over the patient's treatment
- BTell him what to do until another doctor arrives
- CTell him if current treatment is appropriate

Practice Test 20 : Part C – Extract 1 Q(31-36) Answersheet

You hear part of a presentation by Dr Neil Gore about cauda equina syndrome.

- 31

Dr Gore points out that noticing patterns of who is affected is limited by…

- AThe small number of patients that doctors see
- BThe difficulty in diagnosing patients with the condition
- CThe lack of knowledge of the cause of the condition

- 32

Dr Gore recommends first collecting information related to…

- ARecent medical history
- BRelevant symptoms
- CRelevant family history

- 33

Dr Gore points out that all known causes of the condition are related to…

- ADamage to a part of the anatomy
- BPrevious medical interventions

- CDamage caused by infection

34

According to Dr Gore, clinical examination should be done for patients…

- APresenting with certain known symptoms of the condition
- BIn certain groups considered at high risk for the condition
- CPresenting with symptoms or a history related to the condition

35

The clinical examination is primarily focused on……

- ADetermining characteristics related to the pain
- BDetermining level of feeling and muscle response
- CDetermining the risk of experiencing incontinence

36

The type of CES a patient is diagnosed with has...

- ANo bearing on the urgency of the situation
- BSome influence on the next steps to take
- CA lot of influence on how urgent the situation is

Practice Test 20 : Part C – Extract 2 Q(37-42) Answersheet

You hear an interview with Dr Julia Schneider, an expert on Crohn's disease.

37

What is the nature of Dr Schneider´s work with Crohn's?

- ALeading a new research study
- BWorking with patients as a physician
- CConsulting on cases as a dietitian

38

What does Dr Schneider clarify about treatment options?

- AThey only serve to manage the disease.
- BThey are focused on the digestive tract.

- CThey are not often very effective.

39

Dr Schneider explains that genetics plays a role…

- ABut other factors are more influential in the development
- BBut this does not eliminate risk of developing the disease
- CBut not much research has been done on this topic

40

Dr Schneider explains the potential role of the immune system because…

- AA specific virus has recently been identified
- BNot much is known about how this process works
- COf the primary system affected by this disease.

41

Why does the interviewer ask Dr Schneider to talk about one of the diets?

- ABecause it is relatively new compared to the other
- BBecause it is less well-known than the other
- CBecause it has been researched less than the other

42

Dr Schneider explains that the diet has been used to treat…

- ADiseases with similar symptoms to Crohn's
- BDiseases that affect children and adolescent
- CSensitivities to certain types of ingredients
