Perth

Dear Sir/Madam,

Re: Mr Stephen Kerry; DOB: 16 June, 1963

I am writing to request a home visit for Mr Kerry to regain his mobility. He is been recovering from right knee injury secondary to impaired balance due to a history of cerebrovascular accident.

On 12th of this month Mr Kerry was injured following a fall while descending the stairs. He was seen by the Gp and requested home visit from our agency. Gp also advised painkillers as needed to manage pain. Next day we visited Mr Kerry. At that time he was bed bound and not willing to take shower. Paracetamol, 400mg was given for pain. warm compression given and dressing changed. consequently, his pain has reduced and started to walk small distances.

Today Mr. Kerry is walking by the help of his sticks. His wound is also healing well. However, his wife, Mrs Jennifer Kerry is worried about his progress in mobility. Therefore, she requested more visits to accelerate his mobility. Mrs Kerry is educated regarding the need for physiotherapy.

As per above mentioned details, and due to these issues, it would be greatly appreciated if you could take over Mr Kerry for physiotherapy. Kindly provide care as deemed appropriate.

Please do not hesitate to contact me if you have any further queries.

Yours faithfully,

Senior Nurse.
