 - ⇒ You want a prescription of ----
- # Am I right?

4 Analysis

Before any proceeding any further, I'd like to ask you few questions regarding your condition may I?

① When did it start?

② Have you had any \$ like...?

③ Does anything seem to bring it up?

④ Have you tried any yr?

⑤ Did you undergo any X?

⑥ I wonder if you have a family history of similar condition?

① Anything else is bothering you?

② I would like to check/examine you if you don't mind

⑦ Could you tell me more about your lifestyle?

⇒ Do you drink alcohol?

⇒ Do you smoke?

⇒ what do you do for exercise

⇒ Do you eat healthy food?

⇒ would you tell me more about your occupation?

* Silence ⇒ 2 sec

5 Diagnosis :-

Well based on your symptoms & after examination, I believe that you have a condition called ----

Sorry for the medical term have you ever heard about this before?

I appreciate your concerns let me explain

① Def

② Causes

③ Template ⇒ \$ included are typical to your presentation.

- # Rest assured $\Rightarrow$ It is a Common Condition & I see it everyday at my clinic, needn't worry
- $\Rightarrow$ It is a self limited condition

And now we have some ttt remedies to discuss, would you like to go through this with me?

⑥ Management

- # Regarding your management plan, we've lines of treatment
- $\rightarrow$ Abortive & preventative
~~UP~~ ~~RC~~
 - $\rightarrow$ Surgical & conservative
 - $\rightarrow$ Pharmacological & Non-pharmaco

We'll start with

It is important to do

We can't neglect the role of ...

Do you think you can do this?
How does it sound to you?

⑦ Check understanding

Am I clear so far?

How does it sound to you?

Are you following?

Is this comprehended?

Did you get the point?

⑧ Orer summization:

would you like me to summarize what we've discussed?

9 Wishes

- # I hope everything goes well and you feel better soon
- # May God bless your health and get healed soon
- # Wish you speedy recovery →

10

- # if you have any concerns, please do not hesitate to contact me.

Second Visit

I know the patient — I know his condition
So no need to introduce your self

We'll start with ① 3H ⇒ Hello
⇒ Have a seat please
⇒ How are you so far?

He is here either for discussing investigations results

② Your test results are back and
I am so sorry to tell you that you
have a condition called —

③ Sorry for the medical term and sorry for
the bad news ⇒ 5 in criteria of 1st visit

④ Bn bad news
Or for discussing an issue

② tasks

Special Situations

① Review

I would like to see you in a week

② Reassurance

I can understand your concerns

Rest assured, there is nothing to get alarmed about

I know it sounds difficult at self but I'm sure with practice you'll be able to

Don't worry if you follow my advice, you'll get much better soon. I am sure you won't have any more trouble

The staff here is very experienced, and you are in good hands

③ Reluctant patient

I totally appreciate your worries

I know how you feel

I respect your busy time but your health is my priority, let me ask you if you don't mind your healthy or your priority job?

let me explain why ---- is important

when he agreed $\Rightarrow$ I am pleased to hear that

④ Breaking Bad News

We have the test results back

① I am so sorry to tell you that

I realise that this comes as a shock to you

Fortunately we caught it early

The bright side here is that we have a lot of options

② and let me reassure you they are ^{within} normal ranges

⑤ Referral to dietitian:

I highly recommend a referral to dietitian for the reason that he has his own modalities and can provide more healthy food options

♡ Do you think you can do this?

⑥ Referral to ph. th

To speed up recovery, I highly suggest a referral to ... he is able to design a rehabilitation program based on your needs

♡ would you like me to make an appointment for you?

⑦ Exercise

I think you need to exercise daily at least 15 min

I suggest joining to a local gym → you can find there a fitness program that'll help you to lose weight

♡ How does it sound to you?

⑧ Quit smoking

I am afraid that smoking will have a great role in the deterioration of your condition

I know it can be challenging at 1st but I can discuss with you some cessation strategies

♡ would you like to go through this?

Actually we've some remedies like

① nicotine patch

② Some medications also can help like Zyban

♡ would you like to try this?

⑨ Insulin

I totally realise that it may be difficult at 1st. So how about attending our weekly training program?

♡ Is it okay with you?

⑩ Stress management

to manage your stress I think you need to follow some relaxing techniques -

♡ would you like to discuss this?

first of all → you need to reduce working hours

It is important to eat healthy diet

reduce alcohol consumption & caffeinated drinks

⑪ Sleep hygiene approaches

For comfortable sleep you need to follow healthy habits of good sleep

I would like to try this

① Regular rhythm is v. important $\Rightarrow$ one of the main ways to treat your insomnia

② Avoid caffeinated drinks and alcohol

③ Have a hot bath before sleeping time

④ Make sure that sleeping environment is pleasant

Important tips

① No obligation

② Feel sorry for any family member who has a medical problem

③ Listen carefully to your pt, especially when complaining

④ Eye contact is not necessary it is better to focus on your preparation.

⑤ Never to ask your patient multiple questions at the same time

⑪ Sleep hygiene approaches
