Part A

TIME: 15 minutes

• Look at the four texts, **A-D**, in the separate **Text Booklet.**

• For each question, **1**-**20**, look through the texts, **A**-**D**, to find the relevant information.

• Write your answers on the spaces provided in this **Question Paper**.

• Answer all the questions within the 15-minute time limit.

• Your answers should be correctly spelt.

Paracetamol overdose: Questions

Questions 1-7

For each question, **1-7**, decide which text (**A**, **B**, **C** or **D**) the information comes from. You may use any letter more than once.

In which text can you find information about

1 the various symptoms of patients who have taken too much paracetamol? _____

2 the precise levels of paracetamol in the blood which require urgent intervention? _____

3 the steps to be taken when treating a paracetamol overdose patient? _____

4 whether paracetamol overdose was intentional? _____

5 the number of products containing paracetamol? _____

6 what to do if there are no details available about the time of the overdose? _____

7 dealing with paracetamol overdose patients who have not received adequate nutrition? _____

Questions 8-13

Answer each of the questions, **8**-**13**, with a word or short phrase from one of the texts. Each answer may include words, numbers or both.

8 If paracetamol is used as a long-term painkiller, what symptom may get worse?

_____

9 It may be dangerous to administer paracetamol to a patient with which viral condition?

_____

10 What condition may develop in an overdose patient who presents with jaundice?

_____

SAMPLE

11 What condition may develop on the third day after an overdose?

_____

12 What drug can be administered orally within 10 - 12 hours as an alternative to acetylcysteine?

_____

13 What treatment can be used if a single overdose has occurred less than an hour ago?

_____

Questions 14-20

Complete each of the sentences, **14**-**20**, with a word or short phrase from one of the texts. Each answer may include words, numbers or both.

14 If a patient has taken metoclopramide alongside paracetamol, this may affect the

_____ of the paracetamol.

15 After 24 hours, an overdose patient may present with pain in the _____.

16 For the first 24 hours after overdosing, patients may only have such symptoms as

_____.

17 Acetylcysteine should be administered to patients with a paracetamol level above the high-risk treatment line who are taking any type of _____ medication.

18 A non-high-risk patient should be treated for paracetamol poisoning if their paracetamol level is above

_____ mg/litre 8 hours after overdosing.

19 A high-risk patient who overdosed _____ hours ago should be given acetylcysteine if their paracetamol level is 25 mg/litre or higher.

20 If a patient does not require further acetylcysteine, they should be given treatment categorised as

_____ only.
