OCCUPATIONAL ENGLISH TEST

Role Player Card No. 25 — NURSING

SETTING: Emergency department

PATIENT: You are an 18 year old female with undiagnosed anorexia nervosa who has self presented to an emergency department due to severe heart palpitations which you've never had before. Initially the doctors give you some heart drugs to slow your heart back to a normal rhythm but they also now have an intravenous drip connected to you which you are very anxious about and don't understand. Generally you are very defensive and angry in your interactions with staff and are in denial about having anorexia nervosa or any mental health problems.

TASK

- Ask the nurse about why you have a drip running and express fear that it might harm you in some way.
- When the nurse tries to make conversation with you about your eating habits, initially answer some of his/her questions, but fairly quickly become defen sive & angrily ask why it's their business to know about your personal habits.
- When the nurse tells you a psychiatric doctor will come to see you, become angry again, protesting that these doctors are only for crazy people and that there is nothing wrong with your mind. Calm down only when the nurse per suades you that that your eating behaviour is now causing very serious prob lems in your life.

OCCUPATIONAL ENGLISH TEST

Candidate Card No. 25 — NURSING

SETTING: Emergency department

NURSE: An eighteen year old female with undiagnosed anorexia nervosa has presented to your emergency department with an abnormal heart rhythm caused by her poor nutritional status. Cardiac treatment has stabilised her heart but she is still currently receiving a potassium infusion via a drip to prevent further such problems. Other than when she wants you to explain treatment to her, she is defensive and angry to communicate with and in denial that she has any kind of eating disorder or mental health issues.

TASK

- Reassuringly answer her anxious questions about the intravenous drip being given to stabilise her electrolytes.
- Tactfully ask her about her eating habits and food intake, emphasising your therapeutic aims for asking these questions.
- Advise her that a mental health doctor will come to see her soon and when she becomes angry about having to see a 'doctor for crazy people', try to persuade her of the importance of dealing with her mental health/eating issues to prevent such life threatening hospital admissions.

OCCUPATIONAL ENGLISH TEST

Role Player Card No. 26 — NURSING

SETTING: Suburban Clinic

PATIENT: You are the 30 year old parent of a four year old child (Mellisa). You were called to her kindergarten as she had fallen from the playground equipment. You notice that your child has a swollen forearm and you are concerned that it is broken.

TASK

- Find out if your child's arm is broken.
- Find out what treatment is necessary.
- Find out if her arm will grow properly in the future.
- You are very concerned about this as she is in a lot of pain, and has never had any accident like this before.
- Find out what can be done about the pain.

OCCUPATIONAL ENGLISH TEST

Candidate Card No. 26 — NURSING

SETTING: Suburban Clinic

NURSE: This thirty year old parent is concerned about his/her child's forearm, which appears broken. The parent wants to know about the treatment and if the fracture will affect future growth.

TASK

- Find out how it happened. Examination shows that the child has suffered a greenstick fracture which will require a plaster cast and sling.
- Explain
  - future growth should not be impaired;
  - approx. 6 weeks to heal;
  - all normal activities ok, within limitations of wearing plaster

OCCUPATIONAL ENGLISH TEST

Role Player Card No. 27 — NURSING

SETTING: Hospital

PATIENT: You are a 42 year old woman admitted with an exacerbation of chronic pulmonary disease. You work in the insurance sector and have a very hectic and stressful work life. You also have to take care of 3 school going children and find it difficult to cope-up with work and family. Hence you can't imagine quitting smoking though you are aware of how badly it affects you. A specialist nurse is visiting you to discuss smoking cessation.

TASK

- Tell the nurse that you have already reduced your smoking drastically and that it would be impossible to quit completely
- Tell her how stressed your days are with a busy work schedule and a family of 3 children.
- Be hesitant to listen to advice, but reluctantly agree to try quitting
- Ask for alternative destressing methods

OCCUPATIONAL ENGLISH TEST

Candidate Card No. 27 — NURSING

SETTING: Hospital

NURSE: You are specifically assigned the duty of advising those with long-term conditions on smoking cessation and the effects this can have on their condition and treatment. You are meeting a 42 year old woman admitted with an exacerbation of chronic pulmonary disease. She leads a busy life, with an insurance job and a family of 3 children.

TASK

- Explain the effect of smoking on long-term conditions
- Increase the patient's confidence in using treatments to quit smoking while in hospital
- Offer emotional and psychological support
- Suggest other methods to reduce stress

OCCUPATIONAL ENGLISH TEST

Role Player Card No. 28 — NURSING

SETTING: Hospital Ward

PATIENT: You are 42 year old male who has been admitted to hospital with gastritis. The nurse is collecting information from you. You live in your own home with your wife, who is 36 years old, and you have three teenage children living at home. You have been drinking alcohol for 25 years and often suffer abdominal upset or pain.

TASK

- Answer the nurse's questions about your family situation.
- Ask for advice about how to give up drinking.
- Say that you have tried several times and have not succeeded.

OCCUPATIONAL ENGLISH TEST

Candidate Card No. 28 — NURSING

SETTING: Hospital Ward

NURSE: You are talking to a 42-year-old patient, a heavy drinker who has just been admitted with gastritis.

TASK

- Find out about the patient's general background: family, habits and general health.
- Respond to the patient's questions about lowering his alcohol consumption.
- Give advice in a positive and friendly way.

OCCUPATIONAL ENGLISH TEST

Role Player Card No. 29 — NURSING

SETTING — Children's Hospital Ward

PATIENT — The patient is your three year daughter Elizabeth. She is being admitted to hospital for treatment of an ear abscess. This is the first time your child has been in hospital and you are anxious about how she will manage. You can't be at the hospital all the time as you have two other children aged Joan aged 5 and Sam aged 7. The nurse has requested information about your daughter's normal routine at home.

TASK

- Explain your concerns to the nurse.
- Answer the nurse's questions about your daughter's routine. Give a brief answer. Wait for the nurse to ask further questions.
- Ask about the flexibility of visiting hours.

OCCUPATIONAL ENGLISH TEST

Candidate Card No. 29 — NURSING

SETTING — Children's Hospital Ward

NURSE — Elizabeth, a three year old girl has come with her mother to be admitted with an ear abscess. Her mother is anxious about how she will settle in. You need information about the child's normal routine and habits to prepare a nursing care plan.

TASK

- Reassure the mother about the care Elizabeth will receive.
- Ask whether she has any siblings she usually plays with at home .
- Ask about her normal routines at home
  - Usual bedtime – morning or afternoon sleep?
  - Food preferences – able to feed herself?
  - Is she fully toilet trained?
  - Has she brought any favourite toys or books with her?
- Outline visiting hours – 11am – 8pm but stress that overnight stays are possible in a special visiting room.

OCCUPATIONAL ENGLISH TEST

Role Player Card No. 30 — NURSING

SETTING: Hospital

PATIENT: You are a patient who has recently undergone thyroid gland removal operation. A head nurse has now come visited your room to examine you. You are very anxious and you want to explain the problems you are facing after the operation.

TASK

- Tell her about the difficulty in swallowing or speaking
- Ask the head nurse the reason for difficulty in breathing
- Ask how much time will it take to get recovered.

OCCUPATIONAL ENGLISH TEST

Candidate Card No. 30 — NURSING

SETTING: Hospital

NURSE: You are a Head Nurse. You are attending on a patient who has undergone an operation for thyroid gland removal. The patient is unable to speak properly and she has difficulty in swallowing or even breathing properly.

TASK

- Begin with warm and friendly greetings.
- Answer questions that she may ask
- Assure her that problems related to speaking, swallowing, breathing will go away sooner (usually, they go away after 2-3 weeks)
- Advice her not to pressurize her vocal chords by speaking continuously.
- Suggest to elevate her head at all times for the first 4-5 days after surgery, even while sleeping.

OCCUPATIONAL ENGLISH TEST

Role Player Card No. 31 — NURSING

SETTING Hospital

PATIENT You are a patient who is recovering from a minor knee fracture. A nurse visits you in the morning to deliver your breakfast. You want to know when you can get discharge from the hospital as you are a student who has exams next month.

TASK Ask your nurse

- When you can go to your home
- How you can recover from this knee fracture (time duration)
- Is there anything you can do to bring improvement in your present condition.

OCCUPATIONAL ENGLISH TEST

Candidate Card No. 31 — NURSING

SETTING Hospital

NURSE You are delivering breakfast to a patient who is recovering from minor knee fracture. The patient asks you of when he/she can be able to go home as he/she has exams next month.

TASK As a nurse assure him / her that

- He / she will be alright soon
- He / she can take the exam as well
- Advice him / her of the importance of taking medicine on time
- Suggest some easy exercises that will help bring some improvement in his / her knee

OCCUPATIONAL ENGLISH TEST

Role Player Card No. 32 — NURSING

SETTING Nursing Home

PATIENT Your father is a resident at a nursing home and he recently had a stroke. He is now being nasal tube fed. The staff use a lifting machine to transfer him. Many things bother you and have come to the Nurse-in-charge to discuss your father's care.

TASK

- Tell the nurse that you think tube feeding is uncomfortable and that your father might be finding it difficult.
- Ask if there could be any other alternative to nasal tube feeding.
- Show concern about the need for a lifting machine, and its safety.
- Be worried about the patient's privacy.

OCCUPATIONAL ENGLISH TEST

Candidate Card No. 32 — NURSING

SETTING Nursing Home

NURSE You are the nurse incharge and a resident had stroke, so now he is Nasal Tube Fed, and uses lifting machine transfer. His son is visiting the patient and is has concerns about the NTF, lifting machine and privacy.

TASK

- You have to assure the son that these are the best things possible at the moment for his father
- Explain NTF
  - tube feeding prevents chocking
  - nutritional requirements)
- Explain why you use lifting machine.
  - the machine is quiet safe,
  - mproves blood circulation
  - easy to transfer from bed to chair, and transfer to shower
- Explain privacy issues
  -curtains are drawn and the door is shut

OCCUPATIONAL ENGLISH TEST

Role Player Card No. 33 — NURSING

SETTING Hosptial Day Procedure Centre

PATIENT You are a 45 year old married woman with 3 children and a pretty stressful full time job. Recently you have developed some rather unpleasant stomach pains and your doctor has recommended a gastroscopy and a barium meal to see what is going on. You have never had any suchtest before and are terrified that you may have cancer as your grandmother died of 'some stomach trouble' though you don't know exactly what it was.

TASK

- Ask for information and clarification from the nurse
- Tell her how scared you are
- See reassurance and information from the nurse.

OCCUPATIONAL ENGLISH TEST

Candidate Card No. 33 — NURSING

SETTING Hosptial Day Procedure Centre

NURSE Your 45 year old patient has come to the hospital for investigation of abdominal pain which began a few weeks ago. She is extremely nervous about the tests and afraid that she may have cancer

TASK

- Find out why the patient is feeling so anxious
- Make some suggestions as to what the pain may be (indigestion, gall stones, irritable bowel, ulcer etc.)
- Explain some of the tests to the patients, (gastroscopy, barium meal etc.)
- Reassure the patient.

OCCUPATIONAL ENGLISH TEST

Role Player Card No. 34 — NURSING

SETTING Urology Center

PATIENT You are a 40-year-old primary school teacher, also a mother of 6 children, your students give you a nickname: Mrs Rainy because you always wet your trousers, which is caused by pressure-induced incontinence, and your husband is not interested in having intimate physical contact with you because you have trouble holding your urine and you have used the bathroom every 10 minutes, but each time you cant void all the urine.

TASK

- Ask the nurse to get a urologist to prescribe some anti-inflammatory medication
- Show shyness to seek medical attention for the sake of embarassment concerns
- Slowly tell the nurse what the problem you face is
- Seek solutions and support from her

OCCUPATIONAL ENGLISH TEST

Candidate Card No. 34 — NURSING

SETTING Urology Center

NURSE A 40 year old woman who is suffering from some urinary problems demands you to get a urologist to prescribe some anti-infalmmatory medications, but she feels shy to disclose in words what she has been exerpiencing, she is worried about being scoffed at.

TASK

- Find out what problems exactly the patient has without being unfriendly or impolite
- Reassure her and tell her of the possible causes and treatment available.

OCCUPATIONAL ENGLISH TEST

Role Player Card No. 35 — NURSING

SETTING Psyciatric Ward

PATIENT You are a 32 year old bi-polar patient on some anti-maniac medication, however you did not take them regularly

TASK

- Explain the following reasons for you not taking the medication:
  - Sometimes you feel better, so you stop taking this drug...
  - Other times, this drug makes you feel tired and drowsy...
  - There are also times when you give your pill to another patient in the family...
  - Have taken it for 5 days already with no improvement, so you wonder how long it takes to work
- You are worried about how to deal with side effects.

OCCUPATIONAL ENGLISH TEST

Candidate Card No. 35 — NURSING

SETTING Psyciatric Ward

NURSE Your 32 year old patient was diagnosed with bi-polar disorder, when conducting a therapy session, you find out that the patient is not complying with medication regimen.

TASK

- Discuss the condition with the patient
- Find out details about non-compliance
- Offer solutions to the problems.

OCCUPATIONAL ENGLISH TEST

Role Player Card No. 36 — NURSING

SETTING Children's Hospital Ward

PATIENT You are a the parent of a young boy aged 4 who was admitted through the Children's Emergency Department for acute meningoencephalitis as a result of a complication following mumps. He has fully recovered and is ready to be discharged home. You are unaware that a vaccine is available in Australia which protects against mumps. You would like further information and guidance regarding vaccinations. You also have a 2 year old son and have only lived in Australia 6 months. You are concerned because some people say that vaccinations are dangerous.

TASK

- Ask if your child has fully recovered
- Find out what vaccinations are available
- What are the advantages & disadvantages of vaccinations
- Ask if there any side effects from the vaccination
- Ask how expensive they are

OCCUPATIONAL ENGLISH TEST

Candidate Card No. 36 — NURSING

SETTING Children's Hospital Ward

NURSE A young boy aged 4, was admitted to hospital through the Children's Emergency Department for acute meningoencephalitis as a result of a complication following mumps. He has fully recovered and is ready to be discharged home. His parents are unaware that a vaccine is available in Australia which protects against mumps. They would like further information and guidance regarding vaccination for Mumps. They also have a 2 year old son and have only lived in Australia 6 months.

TASK

- Explain to the parent that the boy has fully recovered.
- Make him/her aware of the importance of a full vaccination program for both children.
- Tell them what vaccination is required for mumps and when to have it.
- Inform about the risks and benefits of the vaccination for mumps.
- Explain any side effects that might occur from the vaccination.
- Tell them that vaccination is a requirement of many schools.
- Tell them that vaccinations can be obtained from free health clinics.

OCCUPATIONAL ENGLISH TEST

Role Player Card No. 37 — NURSING

SETTING Accident and Emergency Centre

PATIENT You are Joseph Groom, a male patient aged 23. You were in the city drinking with your friends and became involved in a fight and were knocked unconscious. You hurt your head, hand and shoulder and woke up on the pavement. Due to your injuries, you have decided to visit the A & E centre to get some pain relief. You are having trouble getting your thoughts together but you just want some pain medication so you can go home and "sleep it off".

TASK

- Tell the nurse what happened
- Insist you have a bad headache and want something to ease it
- You also believe your hand is broken
- Be difficult to convince to wait to see a doctor.

OCCUPATIONAL ENGLISH TEST

Candidate Card No. 37 — NURSING

SETTING Accident and Emergency Centre

NURSE You are an A & E nurse. A man has presented at A & E at 3am. He states his name is Joseph Groom. He has suffered a head injury and may have mild concussion. He also has cuts and bruises to his body, his right hand is swollen and his clothes are torn. He is intoxicated. He insists he wants something for pain relief while waiting to see the doctor.

TASK

- Ask for details about what happened
- Find out the extent of his injuries
- Explain that you cannot administer pain relief before examination by a doctor
- Explain that all medications have side effects and that in some cases these are exacerbated by alcohol
- Try make him as comfortable as possible.

OCCUPATIONAL ENGLISH TEST

Role Player Card No. 38 — NURSING

SETTING Home Visit

PATIENT You are a busy 50-year-old waitress, recently diagnosed with Type 2 diabetes. You had a wedge resection 12 days ago and have post-operative infection in your right large toe. You are resting at home and the district nurse is visiting to change your dressing.

TASK

- Admit that you should have followed the surgeon's advice, but did not, so now you have an infection.
- Argue that you need a quick fix to the toe because you need to get back to work, the antibiotics obviously aren't working.
- Agree to use the nurse's list of suggestions and accept that you did not cause your own infection.
- Tell the nurse that you know the risk that diabetics experience with circulation, but would like a brochure on how to manage your illness.

OCCUPATIONAL ENGLISH TEST

Candidate Card No. 38 — NURSING

SETTING Home Visit

NURSE Your patient is a busy 50-year-old waitress, recently diagnosed with Type 2 diabetes. The patient had a wedge resection 12 days ago and has post-operative staphylococcus aureus (staph infection, non-MRSA) on the right large toe. You are visiting the home to change the dressing whilst the patient is resting from work duties.

TASK

- Find out about the patient's general dialy habits after the operation. Did the patient rest adequately?
- Highlight the fact that sometimes people get post operative infection but it is not really their fault.
- Persuade your client to be patient and that the toe will heal with attendance to dressings, fresh air and daily exposure to the sun, antibiotics, etc.
- Explain the risk of circulation problems for diabetes and sometimes greater risk of infection.
- Supply a patient information brochure to the patient and agree to call again next week.

OCCUPATIONAL ENGLISH TEST

Role Player Card No. 39 — NURSING

SETTING Hospital Ward

PATIENT You are Harry Jones aged 78. You are a bachelor who lives on his own. You were admitted to hospital to have a large lesion removed from your back. You know you'll be discharged in the next few days but meantime you want to make the most of the rest and the hospital food. You want the nursing staff to leave you in peace but a nurse says its time to get up and have a shower. You are feeling quite cranky.

TASK

- Point out that you will be home in a few days and there will be plenty of time to shower then.
- Explain that at your age you need rest not exercise.
- Argue that a shower will only wet the dressing on your shoulder.

OCCUPATIONAL ENGLISH TEST

Candidate Card No. 39 — NURSING

SETTING Hospital Ward

NURSE Your patient, Harry Jones aged 78, is in hospital after surgery to remove a large lesion from his back. He is recovering well and you want him to get up and walk about and to have a shower. You have observed that he has neglected his personal hygiene and appearance.

TASK

- Encourage the patient to have a shower, wash his hair and generally get cleaned up. Be tactful as he can be quite cranky if he doesn't want to do something.
- Say you will place a waterproof dressing over the lesion area.
- Stress the importance of exercise and good hygiene in ensuring a speedy recovery.

OCCUPATIONAL ENGLISH TEST

Role Player Card No. 40 — NURSING

SETTING Hospital Ward

PATIENT Your father was scheduled for surgery at 10 this morning but due to some reason he has not been taken to the operating theatre eventhough it is already 11 am. You have been upset seeing your father's long wait. A nurse has just come to talk to you.

TASK

- Be angry for having kept your father waiting.
- Be apprehensive and concerned about the safety of your father as he has not had any food since midnight and hasn't had his routine medicines in the morning. He is very tired now.
- Be unwilling to listen to excuses.
- Insist that your father's rights as a patient is being disregarded.
- Threaten to get him discharged if the uncertainty persists.
- Finally be willing to cooperate on the nurse's assurance that he would be taken care of during the wait which might extend for up to another half hour.

OCCUPATIONAL ENGLISH TEST

Candidate Card No. 40 — NURSING

SETTING Hospital Ward

NURSE You have been called to the patient's bedside. The patient was supposed to go in for his surgery at 10 am and was second on the list but surgery was delayed because the previous patient had some complications during surgery. Apparently he had never had an anesthesic before and was suffering from post op vomiting, hadn't passed urine and is in pain. The patient's daughter is very angry and wants to talk to you.

TASK

- Find out why the patient's daughter is angry.
- Empathise with the daughter about the delay but be realistic about how long the patient may have to wait.
- Explain why the operation is late, try not to blame Theatre staff but explain post op complications can be unavoidable.
- Negotiate with the daughter to prevent her from insisting her father is discharged.

OCCUPATIONAL ENGLISH TEST

Role Player Card No. 41 — NURSING

SETTING: Gastroenterology Clinic

PATIENT

You are a 25 year old who has just received a diagnosis of Irritable Bower Syndrome. You had a colonoscopy early this week at the clinic. You have had several episodes of abdominal cramps, flatulence and diarrhoea. It's been very embarassing as you did not know what to do about the symptoms.

TASK

- You have had some episodes of painful abdominal cramps, frequent wind problems, which are very embarassing, and bowel problems. It started about 3 months ago - you have had bouts of diarrhoea and constipation. It has happened a few times. You have been off your food. You feel bloated and uncomfortable. It is very painful when it happens.
- You have noticed that it was worse a few months ago as you had a lot of stress at that time. You started a new job which is highly paid but very stressful.
- You've heard the name before, IBS, but you don't know anything about it. You thought it meant that you were allergic to fibre in food.
- You understand about the tablets now. Check that you only take the tablets if you have cramps, diarrhoea or vomiting. Confirm that the other suggestions, diet changes and stress management, are things she should do all the time to try to prevent future bouts of the condition.

OCCUPATIONAL ENGLISH TEST

Candidate Card No. 41 — NURSING

SETTING: Gastroenterology Clinic

NURSE

You are the nurse who works at the Gastroenterology Clinic. You see patients after they undergo tests at the clinic. You are now talking to Jenny Vassily, a 25 year-old who has been diagnosed with Irritable Bowel Syndrome at the clinic. The patient is not sure about the conditions and needs advice about treatment and management.

TASK

- Find out about the symptoms she experiences eg. type, duration, frequency, pain.
- Find out about any triggers she may have noticed - e.g. stress
- Explain what IBS is in simple language - no clear cause but intestines probably over sensitive at times, smooth muscle becomes over active - spasms, cramps, IBS - either constipation, diarrhoea or both
- Outline treatment options - pt has been supplied with medication for pain, diarrhoea and constipation. She needs to make diet changes (avoid high fibre foods and gas-producing foods like cabbage, eat regular meals). Stress management - suggest activities like yoga, meditation or gentle walks.

OCCUPATIONAL ENGLISH TEST

Role Player Card No. 42 — NURSING

SETTING Suburban Clinic

PATIENT Yesterday at work, you had a fit and you fell over. Your eyes were rolling and you can't remember what happened. (Your colleagues told you what happened afterwards)

TASK

- Tell the nurse how terrified you are of having epilepsy
- Deny the fact that you could possibly have epilepsy
- Have an emotional reaction to the problem. Be hard to get through to.

OCCUPATIONAL ENGLISH TEST

Candidate Card No. 42 — NURSING

SETTING Suburban Clinic

NURSE The patient was recently involved in a car accident and suffered cuncussion.

TASK

- Get details of the current problem; the patient seems to have seizure at work.
- Listen with empathy and pacify the patient.
- Discuss the possible causes of the seizure (brain damage etc), the test required (an EEG) and the range of treatment available (medication)

OCCUPATIONAL ENGLISH TEST

Role Player Card No. 43 — NURSING

SETTING: Secondary School

PATIENT: You are Richard Gibson, a grade 9 student at Hastings Secondary School. Your teacher has asked you to see the visiting school nurse as he thinks that you have put on more weight recently. You have been experiencing lethargy and has been inatentive in class.

TASK

- Tell the nurse about your tiredness and difficulty in being attentive
- Ask her for advice on reducing weight
- Be unwilling to reduce fast food because that's what you enjoy eating
- Agree reluctantly to consume fruit and veggies
- Agree to monitor your weight and see the nurse again after a month

OCCUPATIONAL ENGLISH TEST

Candidate Card No. 43 — NURSING

SETTING: Secondary School

NURSE: You are the visiting school nurse at Hastings Secondary School. You are seeing Richard Gibson, a grade 9 student who is obese. He does not participate in any physical activities at school or at home and consumes fast food and sugary beverages a lot. He feels sleepy while attending classes.

TASK

- Have his body mass index measured
- Ask about his lifestyle and routines
- Encourage him to take up any sport or other physical activities
- Make him aware about healthy lifestyle choices and also warns of the long impact of too much junk food.
- Ask him to keep a tab of his weight every week and to see you a month later on your visit to the school

OCCUPATIONAL ENGLISH TEST

Role Player Card No. 44 — NURSING

SETTING — Community Health Centre

PATIENT — Your doctor has referred you to the community health nurse for advice about lifestyle changes, as your blood pressure is high. You know that you haven't been paying much attention to your health recently buy you have a stressed job as a lawyer and your busy schedule makes it difficult for you to exercise on a regular basis. You also smoke a packet of cigarette a day and enjoy a couple of drinks after work; although you know this isn't good for you, it helps you to cope with the stress of work.

TASK

- Answer the nurse's questions about your lifestyle honestly, but be a bit defensive in your replies.
- Be resistant at first to any of the nurse's suggestions about how you can modify your lifestyle, given the stresses you are up against at work.
- Finally, agree to some of the changes suggested but continue to be adamant that you cannot give up smoking.

OCCUPATIONAL ENGLISH TEST

Candidate Card No. 44 — NURSING

SETTING — Community Health Centre

NURSE — The client has high blood pressure and has been referred to you for advice on lifestyle changes aimed at reducing it. The medical report indicates that the client smokes, drinks and does not take any regular exercise. He/she has a stressful job as a lawyer.

TASK

- Question the client about his/her smoking, drinking and exercise habits.
- Suggest ways in which your client can modify his/her lifestyle to improve his/her health.
- Be sympathetic to your client's reasons for being reluctant to change his/her habits but insist that at least some changes are necessary for the sake of his/her health.

OCCUPATIONAL ENGLISH TEST

Role Player Card No. 45 — NURSING

SETTING Operating Theatre – Recovery Room

PATIENT You are Doris Mack aged 80. You have woken up following hip replacement surgery and are having trouble getting your thoughts together. Keep asking for your daughter and say you need a cup of tea as your mouth is dry.

TASK

- Be confused about where you are
- Don't pay any attention to what the nurse is saying - keep asking for your daughter
- Listen to the nurse's explanation
- Say you need a cup of tea now as your mouth is dry

OCCUPATIONAL ENGLISH TEST

Candidate Card No. 45 — NURSING

SETTING Operating Theatre – Recovery Room

NURSE You are a nurse in an operating theatre recovery room. 80-year-old Doris Mack is recovering after hip replacement surgery. She is receiving IV fluids. She has been able to tell you her name but seems confused about where she is. She keeps asking to see her daughter and to have a cup of tea.

TASK

- Explain her situation
- Check for understanding
- Re-explain if necessary
- Advise her that her daughter is waiting to see her in the post-operative ward
- Explain that hospital policy excludes visitors from the recovery room
- Explain why she cannot have fluids by mouth at this stage
- Assure her that she will be taken back to her ward shortly and then her needs will be attended to based on the doctor's orders.
