Community Nurse Head
Care Well Hospital
Birmingham.

05 May 2010

Dear Community Nurse Head,

Re: Mr. Alfred Billy:

I'm writing to refer Mr. Alfred Billy, a 52-year-old truck driver admitted to our hospital with diagnosis of ~~skin cancer –~~ Basal Cell Carcinoma of the neck.

Mr. Billy doesn't have any significant past medical history, but in terms of social history, he has been drinking for the last 30 years, and is a smoker.

During his stay at the hospital, he has not developed any complications. Skin biopsy is done and sent for pathological study. He is taking Panadin Forte 500mg for pain control.

Mr. Billy is stable and well at the time of discharge and has no complaints of pain ~~at the moment~~. It is advised to continue his medication for one more week. In addition, daily observation is suggested. You can contact her wife, Mrs. Maria Jennifer, who is staying with him in case of emergency.

Thank you for agreeing to see Mr. Billy. Should further information be required, do not hesitate to contact me.

Regards,

Charge Nurse

Re: Alison Cooper, DOB: 14/06/2002

Dear Mr. Webster,

I am writing to refer Alison Cooper, a year 5 student for your assessment.

Alison lives with her mother, who is working full time as a bank manager and her two siblings. Alison had been good at studies until his father's death. Since then she is regularly being absent from school. Her grandmother usually picks her up from school when she needed to be sent back home due to sickness. She has trouble concentrating in the class and is reluctant to take part in class or sport activities. Moreover, she is insecure about being overweight and having eczema in her hands.

Alison's mother was contacted by the class teacher and~~, to which~~ she responded that Alison is becoming withdrawn at home also. She revealed that Alison was so close to her father and still grieving his death, which makes her seek comfort in eating junk foods.

It would be greatly beneficial to Alison if you could assess her to find out her psychological problems. Should you need further information, do not hesitate to contact me.

Yours Sincerely

School Health Nurse

Re: Mr. Bob Dawson, DOB: 25/09/1924

Dear Ms. Devonport

I am writing on behalf of Mrs. Elizabeth, wife of Mr. Dawson to request a home visit to assess and advise regarding improving her husband's mobility.

Mr. Dawson has had suffered cerebrovascular accident four years ago. He undergone for a successful rehabilitation, but still has residual weakness on the right side with slight balance and speech impairment. On 18/05/2008 he sustained an injury to his left knee due to a fall. Our agency has been helping with dressing his wound and showering as per the request of his GP.

After a few days of caring, it was noted that his knee was healing well and he could walk around house with assistance of his wife. Use of walking stick has been suggested, but found out that he is not sure how to use it properly.

It would be greatly appreciated if you could arrange a physiotherapist to visit their home and provide assistance to improve his mobility. I have attached the home address with this letter.

Should you need any further information, do not hesitate to contact me.

Yours sincerely,

Sonya Matthews

07 September 2010

Dear Ms. Bruin,

Re: Mr. Gerald Baker, Aged 79 Years

Mr. Baker ~~is being referred~~ back into your facility for continuity of care. He has undergone for a left total hip replacement surgery and is ready for discharge today.

During hospitalization, following the surgery, he seemed to be disoriented, probably because of the anesthesia. Moreover, his Hb level dropped to 72, for which he has been transfused with 3 units of packed red blood cells, which helped to raise the Hb level to 112. Other than that he had no complaints and started to ambulate with the help of a wheelie – walker.

He was prescribed ~~with~~ aspirin 100mg, ramipril 5mg to control his blood pressure and Panadeine Forte 2 tablet three times a day as needed to control the pain, of which the latter needs to be monitored. In addition, occupational therapy along with range of motion exercise was provided.

It is advised to continue with the exercise program and to observe and preserve the skin integrity. A toilet raiser has already been arranged by the hospital social worker for two weeks and a wheelie-walker and a wedge pillow will be sent with ~~the~~ Mr. Baker. Please note that his staples to be removed on 21 September and a follow-up visit has been scheduled on the same day to check his FBE and UES.

Should you need any further information, do not hesitate to contact me.

Yours Sincerely,

Charge Nurse

Dear Sir/Madam,

Re: Mr. Andrew O'Connor, aged 74 years

I am writing to request daily home visit to Mr. O'Connor, who has been diagnosed with stroke. He will be discharged from North West Rehabilitation Hospital back home on 22 March.

During hospitalization, after the diagnosis of stroke, which resulted in right side paralysis, he was given intensive physiotherapy and occupation therapy, but noted that he was responding to the therapy slowly. He requires assistance with activities of daily living. However, he can eat by himself and move around slowly with the help of a frame.

In view of his present condition, option of nursing home placement was advised to the family, but they refused the same. So, necessary modifications were done to his bathroom and toilet after a home assessment last week.

In terms of social history, Mr. O'Connor lives with his 71-year-old wife, who has heart problems. Moreover, his kids do not live near by.

It would be greatly beneficial to Mr. O'Connor and his family if you could arrange a nurse to visit his house twice daily to help him with mobilization, bathing and grooming. Please monitor his medications and also his wife's health. Note that Mr. O'Connor will have to attend day hospital three times a week. Details of his medications along with doctor's note will be forwarded with the patient. If necessary, the patient can be referred to our hospital.

Should you need any information, please do not hesitate to contact me.

Yours faithfully,

Charge Nurse

Newtown, Bray brook

16 July 2017

Dear Ms. Wilkins,

Re: Mrs. Aisha Amari, aged 75

I am writing to request home care for Mrs. Amari~~, an elderly woman,~~ who lives alone. She attended our clinic today with complaint of chronic ankle pain and was discharged after a day of care.

In terms of medical history, Mrs. Amari has been suffering from Type 2 diabetes mellitus and hypertension for 3 years and 18 months respectively for which she is on beta-blockers and calcium channel blockers. Moreover, she has been managing her chronic ankle pain with Paracetamol and Deep Heat cream.

Despite having blurred vision and mild memory loss, Mrs. Amari can ambulate and transfer independently and her speech and hearing are within normal limits. Also, her bowel and bladder are incontinent. There are no assistive devices installed at her home apart from a pull-cord in bathroom and bedroom.

It would be greatly appreciated if you could arrange a home care nurse to visit Mrs. Amari two days in a week in order to help her with showering, dressing and some household chores. In addition to that, please assess her house for installation of assistive devices. May I remind you that, she does speak only Arabic and her son, Mr. Ahmed, can be contacted for interpretation.

Should you need any further information, please do not hesitate to contact me.

Yours sincerely,

Nurse

11 July 2017

Dear Sir/Madam,

Re: Mr. Bruce Brew, aged 36

Mr. Brew, a farmer, who has been diagnosed with stage 3 oesophageal cancer, is being transferred into your facility for urgent assessment and specialized management.

Mr. Brew was admitted to our hospital 5 days ago with complaint of pain below the sternum. On assessment, he appeared malnourished, distressed and pale. Moreover, there was tenderness in the epigastric area on palpation. During the hospital course, he underwent several procedures including endoscopy, biopsy and barium swallow, which confirmed his diagnosis of cancer in the gastroesophageal junction. Oxycodone was administered intravenously to control his pain.

Regarding his medical history, Mr. Brew has been suffering from heartburn for the past few year for which he treated himself with OTC medications. In addition, he had lost around 10 kg in 6 months and was facing swallowing difficulty. He has been a heavy drinker with family history of cancer.

Comment [teacher1]: years

Comment [teacher2]: a

Mr. Brew is being transferred to you by Seymur Ambulance Service. **Tel. 1300 606060.**. Based on his present condition, he will need an urgent evaluation to assess the need for surgery or radiotherapy, or both. Also, his reports are attached with this letter. Please note that the patient has already been informed of his condition.

Thank you for your assistance in this matter. Should you need any further information, please do not hesitate to contact me.

Yours faithfully

Nurse

Ms. Loretta Pasquale
Physiotherapist
43 Anderson Street
Templestowe

12 January 2016

Dear Ms. Pasquale

Re: Mr. George Chien, aged 54

I am writing to refer Mr. Chien, who has been diagnosed with osteoarthritis of right knee, ~~into your care~~ for assessment and care. He is medically stable and was discharged home today.

Mr. Chien came into our hospital on 10 January with complaint of progressive right knee pain. He has undergone right total knee surgery recently. On assessment, his right knee was swollen moderately with fluid build-up, which resulted in severe difficulty moving his right lower extremity.

Comment [teacher1]: a

During hospitalization, Mr. Chien was found to be moderately anemic. His knee swelling was treated with ice packs. In addition, Arixtra was prescribed for pain, which was discontinued prior to discharge.

Mr. Chien can now ambulate short distance with the help of a front-wheel walker. Moreover, he is able to do lower body dressing with minimal assistance. However, he still needs assistance with bed mobility and transfers due to limited range of motion of right knee.

Comment [teacher2]: distances

Comment [teacher3]: the

It would be greatly appreciated if you could provide Mr. Chien with a comprehensive rehabilitation treatment to improve his mobility and speed up his recovery. Please note that his surgical knee incision is completely healed now.

Should you need further information, please do not hesitate to contact me.

Yours sincerely,

Nurse

The Admitting Doctor
Emergency Department
Spirit Hospital

10 July 2012

Dear Doctor,

Re: Mrs. Betty Olsen, DOB: 29 January 1929

I am writing to refer Mrs. Olsen, who is a resident of Golden Pond Retirement Village for your urgent assessment and care. She is being transferred to the Emergency Department by ambulance after she was complaining chest pain and looked distressed.

Mrs. Olsen complained of shoulder pain on 07 July, which was relieved Panadol and Normison tablets. Two days later, she requested for Mylanta and Panadol for indigestion and shoulder pain. On assessment ~~in the Moring today~~, she looked tired and weak. Moreover, her BP was found to be high~~er~~ at 180/95. In the evening she could not eat the meal as she was nauseous as well as complaining shoulder ~~pain~~ and neck pain. For this reason, she was prescribed Panadol and Normison. However, on reassessment at 10.45pm, she appeared pale, sweaty and reported to have persisting chest pain, and hence decided to shift her to the hospital.

In terms of her medical history, Mrs. Olsen has been suffering from hypothyroidism, hypertension and glaucoma for past several years for which she is on Karvea 150mg, ~~and~~ Oroxine 0.1mg once daily, Timolol Eye Drops 0.5% twice daily and Normison 10mg as required.

It would be greatly appreciated if you could assess Mrs. Olsen urgently and treat her as you feel appropriate. ~~Please note that she is allergic to penicillin.~~

Should you need any further information, do not hesitate to contact me.

Yours sincerely,

Nurse

Ms. Susan Williams
The Hospital Social Worker
Prince Charles Hospital
Brisbane

05 April 2012

Dear Ms. Williams,

Re: Mr. Yanlin Ma, DOB: 31 March 1980

I am writing to refer Mr. Ma, a Chinese student, who has been diagnosed with aortic dissection, for your assistance with paper works associated with university and immigration. He underwent an open-chest surgery on 31 March and is due to be discharged on 09 April.

Mr. Ma was transferred to our hospital on 31 March from Royal Brisbane Women's Hospital after investigations revealed that he had dissection of aorta. Apart from being hypertensive for first few days, he made good recovery from the surgery.

Commented [JG1]: the

In terms of social history, Mr. Ma smokes around 5-6 cigarettes per day. In addition, he is overweight with a body weight of 105kg. His mother has reached Australia recently, however, she does not speak English. Moreover, the lease contract on his accommodation has already ~~been~~ expired and his visa will be expiring at the end of the semester. There is a main concern that he will not be able to finish university assessment on time.

It would be greatly appreciated if you could visit Mr. Ma before his discharge to help him with arranging an accommodation as well as preparing letters to university and immigration. Arranging a referral to a smoking cessation and a weight loss program will also benefit him.

Should you need any further information, please do not hesitate to contact me.

Yours sincerely,
Annie Smith
Cardiac Nurse

I am writing to inform you regarding Ebola and its possible route of transmission as a part of government's awareness campaigns initiative.

Ebola is a contagious and deadly disease characterized by fever and severe internal bleeding. The Filo virus which is responsible for the disease spread through direct contact with infected body fluid. Precautions are necessary, because Australia is in danger of spreading Ebola.

It is important to note that Ebola can be contracted if a person is exposed to a suspected or confirmed case with in 21 days. The ways in which someone can get the disease include living with a confirmed case and being in close contact with a patient. There is also a possibility with touching blood, body fluid or clothes of a dead or alive patient. Moreover, a baby breastfed by an infected mother is also at high risk.

In addition, a sick or dead animal can also be a source of infection. Those who had direct contact with an infected animal, had exposed to animal's blood or body fluid or ate raw bush-meet have high chance of being an Ebola patient.

Should you need any further information do not hesitate to contact me at the camp.

Yours faithfully
Community Nurse

Dear Sir/Madam,

Re: Mr. Mavis Brampton, 72-year-old widow

I am writing to refer Mr. Brampton, who has been diagnosed with pleurisy ~~into your care for assessment, monitoring and continuity of care.~~ ~~She~~ and is being discharged today after 5 days of care.

Mr. Brampton came into our hospital with complaints of fever, productive cough and shortness of breath. Various medicines including antibiotics were started to control her fever and eventually she made a good recovery.

In terms of social history, Mr. Brampton lives alone. Apart from this, she has been a smoker for a long time. For this reason, she was advised to stop smoking. In addition, nicotine patches and Zyban 150 mg three times a day were prescribed to help him quit smoking.

It would be greatly appreciated if you could observe her for the compliance ~~to the~~ medications and adherence to the non-smoking regimen. She will need to continue Zyban for next two months and nicotine patches until the craving for the cigarettes stops. However, Zyban should be stopped immediately if she develops dry mouth or difficulty sleeping. It would be a great help to her if you could arrange ~~a~~ Meals on Wheels to provide with nutritious meals to help her reduce some weight. Please note that, she needs assistance with shopping as well as house keeping.

Should you need any information, please do not hesitate to contact me.

Yours faithfully,
Nurse
Northern Community Hospital
